NEW! Dynolite Oils

For veteran, vintage & classics

COMPETITIVE PRICES

Our comprehensive range of tools, lubricants and consumables are chosen to help you get the job done

Dynolite offers a broad range of oils and lubricants for Veteran, Vintage and Classic cars & motorbikes. Dynolite lubricants are blended to exceed the original vehicle manufacturer's

specifications. They are formulated from high quality components and are only combined with additives specially selected for their compatibility with metals and components used in older vehicles including suitable levels of ZDDP, often reduced from modern oil blends, to combat wear. Most modern oils do not cater for these older technologies.

Lubricants available for modern vehicles, although they are of a very high technological quality, are not suitable for older cars or motorbikes. They are too

fluid, not 'oily' enough and their additives only apply to modern mechanical assemblies and materials. In fact, modern lubricants can have adverse effects on older engine components due to the different metals and seal technologies used in classic car engines, gearboxes & axles compared to modern production cars.

Dynolite's philosophy stands out for its range, offering specific lubricants for engines, gearboxes, steering boxes, as well as greases. In terms of mechanical protection, Dynolite lubricants are far superior to those usually found on the market for the simple reason that they have been specially developed for your historic vehicle. Therefore, you benefit from increased protection, higher oil pressure combined with a lower degree of acid attack and corrosion, reducing gum and sludge formation

PW range
Multigrade mild detergent & dispersant engine oils

The PW range of motor oils are mild-dispersant & detergent oils specially designed for vintage & classic cars produced up to 1950s, prior to the introduction of multigrades, where a non-detergent formulation is required. These oils should be used on engines that do not have a micro-particle filter (made of paper or felt), as these engines require an oil that is purified by sedimentation in the sump. This oil should also be used where an engine condition is unknown.

PW engine oils reduce the dispersal of accumulated sludge and carbon deposits that may be in the engine. It also contains corrosion inhibitors to protect the engine during prolonged periods of inactivity.

If the engine has been rebuilt or converted to use a micro-particle filter use the equivalent grade APG oil.

- 1 PW30 light 2lt (20w/60 replaces SAE30)
GGL811120£9.95
- 2 PW40 medium 2lt (25w/70 replaces SAE40)
GGL811220£9.95
- 3 PW50 heavy 2lt (40w/70 replaces SAE 50)
GGL811320£9.95

(This 40w/70 oil is an ideal multigrade for engines that originally required either a monograde SAE50 or castor oil. It is also specially recommended for engines using roller or ball race con rod and crankshaft bearings (e.g. motorcycles, Porsche Carrera, Bugatti).

APG range
Multigrade detergent & dispersant engine oils

The APG range of oils is formulated for engines produced after 1950 and up to 1985 where micro-particle oil filters are used. These filters are either felt or paper construction. They replace the monograde SAE engine oils and give improved lubrication and oil consumption

- 4 APG30 2lt (20w/60 replaces SAE30)
GGL812220£9.95
(Formulated for post-war engines, in particular high-performance vehicles such as MG, Porsche, Jaguar, Triumph, Ferrari, Alfa, etc. This oil is also recommended for cars using a 6 volt electrical system, where the starter motor requires minimum resistance at start-up).

- 5 APG40 2lt (25w/70 replaces SAE40)
GGL812320£9.95
This viscosity is specially adapted for post-war large cylinder engines or for engines with low pressure oil pumps, i.e. for most post-war motorbikes. This oil contains additives which improve hot pressure as well as oil consumption.

APG CLUB 20w/50
Multigrade oil for popular vehicles of the fifties & sixties.

The APG Club 20w/50 is a high viscosity oil, offering maximum protection for an affordable price.

- 6 APG Club 5lt (20w/50)
GGL812150£20.40

Synth 15w/60

This synthetic multigrade engine oil is specifically developed for modern multi-valve, twin cam, turbo and all high-performance engines. The synthetic blend of this oil offers immediate protection and is recommended for modern classics, MGF & MX-5s. It is also recommended for classic race & tuned road cars where the engine is recently or regularly rebuilt and the internal condition is known to be clean. As synth 15w/60 is a highly detergent oil, it is not recommended for classic road going cars where the internal condition of the engine is unknown.

- 7 Synth 5lt (15w/60)
GGL813150£31.96

8

Running in oil

Running-in a newly rebuilt classic engine is essential for its long term health. Classic engines require the pistons & rings to 'bed in' to the cylinder bores to give the correct sealing characteristics. Modern oils contain additives that, particularly in old-style engines, prevent correct running-in, causing glazing of the cylinders, which leads to excessive oil consumption, requiring further disassembly & rebuilding of the engine. The running-in oil was developed to allow the beginning of running-in for new segments on the cylinder walls. This oil must be used during the first 500 to 800 km. on old cars.

- 8 Running In Oil 5lt
GGL819150£29.95

9

10

Gear Oils
Gearbox Oil Range

These two multigrade oils replace the SAE30 & 40 as well as the EP80 & EP90 commonly used in gearboxes. They are compatible with straight-cut and synchromesh gears, and safe for use in overdrive units. They do not contain any "EP" type additive that would destroy metals such as bronze, copper or

brass. These oils do not contain any friction modifier additive causing slipping of overdrive clutches and preselected gearboxes (Cotal, Wilson).

- 9 Gear oil 30 1lt (Replaces oils originally specified as EP80, SAE30 & 20w/60)
GGL821120£12.95
- 10 Gear oil 40 1lt (Replaces oils originally specified as EP90, SAE40)
GGL821220£12.95

11 12 13

Hypoid oils range

Multigrade mild detergent & dispersant engine oils

In a Hypoid type gear, the teeth simultaneously rotate and slide against one other. This action requires the use of extreme pressure (EP) additives to prevent wear.

Mild EP

This SAE140 grade oil is for use in Hypoid type gears manufactured before 1960 and screw gears (e.g.: Peugeot). It is blended to GL4 specifications, rather than GL5, meaning it will not affect 'yellow' metals such as bronze, copper and brass typically used as bushes, ring or shims.

- 11 Mild EP 2lt
GGL824120£13.96

Hypoid oils

Full hypoid oils blended to GL5 specification used in many cars and light chassis vehicles from 1960 onwards. Check driver's handbook for requirements.

- 12 Hypoid 80w/90 2lt (replaces EP80)
GGL823120£15.95
- 13 Hypoid 85w/140 2lt (replaces EP90)
GGL823220£16.96

14 15

Limslip 75w/140

This multigrade oil was especially developed for self-locking or limited-slip final drive of the "ZF" or "Salisbury" type. These can be found on sports cars such as Jaguar, Aston Martin or Maserati.

- Limslip 75w/140 2lt
GGL825120£16.96

No noise EP 85w/140

This EP 85w/140 oil was developed to mask noisy gearboxes and gears and is compatible with bronze, copper & brass components. Beware: the oil masks the noise but does not prolong the life of a worn out mechanical component.

- 14 No noise EP 85w/140 2lt
GGL823320£16.96

Automatic gearbox fluid

Oil for automatic transmissions and steering gearbox when original specifications recommended: "Fluid Type A, Suffix A, Dexron, Dexron-II".

- 15 Automatic gearbox fluid (ATF) 2lt
GGL826120£16.96

16 17 18

Transoils range

These straight transmission oils, without additives, have been designed for use in conical torque, non-hypoid gear systems such as straight bevel, spiral bevel or worm gears. The choice of viscosity is dictated by the technology used, therefore, the viscosity recommended by the manufacturer must be used. During use, the more fluid the oil, the smoother the gear change.

- 16 Transoil 90 2lt (This oil is suitable for axles and gearboxes of light to medium vehicle from the twenties & thirties.)
GGL822120£12.95
- 17 Transoil 140 2lt (This oil is suitable for axles and gearboxes of light to medium vehicle from the twenties & thirties.)
GGL823120£15.95
- 18 Transoil 250 2lt (The thickest transmission oil, also known as 600w ideal for veteran and Edwardian rear axles and where the gearbox needs a high viscosity oil.)
GGL822320£12.95
- Transoil semi-fluid 900ml (This semi-liquid grease is ideal for the transmissions of certain vintage cars and for the gearboxes of motorbikes such as the Burman.)
GGL831109£10.96

19 20 21 22

Greases, oils & general products

High melting point grease

This waterproof grease is suitable for chassis and suspension component lubrication such as ball joints, steering rack assemblies, hub bearings, etc. The molybdenum content improves the lubrication under extreme load conditions such as UJs and sliding splines in drive train components. It is also ideal for exposed ball bearings as it has excellent resistance to centrifugation and water projections. This grease is also ideal for engine assembly particularly on camshafts and tappets. Do not apply this grease on pistons, bores & rings as its lubricating power is such that it would prevent running-in of the rings.

- High melt grease 900g
GGL841109£10.96

Shock oil

This oil is for simple or double action shock absorbers, in particular for "Armstrong" lever shock absorbers and motorbike forks.

- 19 Shock oil 1lt
GGL832101£10.96

Steering box oil

This semi-fluid grease is specially formulated for use in steering boxes. It is non-corrosive and provides extreme pressure protection to the components.

- Steering box oil 900ml
GGL831109£10.96

Supercool

Supercool is specially formulated to enhance cooling system performance by maximizing the thermal transfer ability of the antifreeze/water solution or plain water. New premium additives stabilize the pH in the coolant to prevent harmful corrosion and

sludge build up. Non-toxic & environmentally friendly, Supercool is safe to use in all systems and with all types of glycol based anti-freezes. Not compatible with waterless coolants. Warning - This product is not an anti-freeze!

- 20 Supercool 473ml
GGL852104£7.96

Lead substitute

This additive was specially formulated for classic vehicles enabling the use of lead-free petrol and enhancing the lubrication of first generation valve guides and injection pumps. This additive also contains stabilising agents that fight against deterioration of the petrol during long periods of inactivity and acts as a cleanser for the fuel circuit. Suitable for use with all types of fuels including ethanol fuels (E10).

- 21 Lead substitute 250ml
GGL871102£7.96

Silicone brake fluid

Unlike traditional mineral fluids, this silicone brake and clutch fluid is non-corrosive and non-hygroscopic. It is water repellent and will not absorb water, like a traditional brake fluid, which can lead to corrosion within the cylinders and pipe work. Silicone brake fluid can be used in both brake and clutch circuits but is not compatible with other brake fluids. This fluid can be used to replace existing mineral fluids but the system must be thoroughly cleaned first.

- 22 Silicone brake fluid 473ml
GGL862104£9.95

Super degreaser

This professional quality degreaser is ideal for degreasing engine bays and mechanical components.

- Super degreaser 5lt
GGL891150£18.95

Millers classic oil range has been specifically developed to protect and enhance the engines of classic vehicles.

Millers classic lubricants utilise modern additive technology in period style viscosities to enable the classic vehicle owner to obtain the optimum lubrication for their car.

Fuel additives

VSPe Power Plus

Lead replacement and octane booster with added benefit of ethanol protection. Adds up to 2 octane numbers (20 points) to pump fuel, it prevents valve seat recession and combats the adverse effects of ethanol in fuel. Also contains additives to prevent fuel system corrosion and anti-oxidants to improve fuel life. Recommended for all classic engines previously requiring leaded fuel, now running on unleaded fuel.

1 VSPe Power Plus 250mlGGL4030X£7.96

VSPe

Lead replacement with ethanol protection. Prevents valve seat recession and combats the adverse effects of ethanol in fuel. Also contains additives to prevent fuel system corrosion and anti-oxidants to improve fuel life. Recommended for all classic engines previously requiring leaded fuel, now running on unleaded fuel, where an octane improver is not required.

2 VSPe 250mlGGL4031X£7.50

EPS

Ethanol protection only. Combats the adverse effects of ethanol in fuel, also contains additives to prevent fuel system corrosion. Recommended for classic engines that have been rebuilt (or fitted with a cylinder head that has been rebuilt) using hardened valve seats, previously requiring leaded fuel, now running on unleaded fuel where lead replacement and an octane improver are not required.

3 EPS 250mlGGL4032X£6.50

CVL - Competition Valve Lubricant

Complies with FIA fuel regulations for historic racing and enables older race engines to run safely on unleaded fuel. Adds 3 octane to base fuel.

4 CVL - Competition Valve Lubricant 250mlGGL4011X£11.75

CVL Turbo

An out and out octane booster, adding 4 octane to base fuel, ideal wherever the maximum octane is required. Will give 103 octane when added to Shell V Power.

5 CVL Turbo 500mlGGL4010X£15.95

OIL ACCESSORIES

Oil spill mat

The spill mat neatly absorbs dripped or spilt oil to keep working area surfaces clean when carrying out oil changes or whilst your car is laid-up.

Oil spill matGAC2028X£12.95

Oil drip tray

This oil drip tray will keep your working area clean when carrying out an oil change or whilst your car is laid-up. This stainless steel drip tray is long enough to cover the floor beneath both the engine and gearbox.

Oil drip tray (635mm x 1200mm approx)GAC9905X£26.95

Oil drainer

This oil drainer allows you to easily collect oil from your car's sump, gearbox or axle without spillage. This lightweight unit is manufactured from high-density polyethylene and resistant to most chemicals and solvents. It has a wide opening and an anti-splash lip, recess for drain plug, large handles and a built in spout to allow transfer into a suitable container. 450mm OD, 340mm aperture diameter, 16 litre capacity.

Oil drainer with spoutDMR23258£13.96

Modern lubricants do not necessarily suit older vehicles, the oils are often too thin, and the additive packages suit today's advanced engineering and materials, not those used in the design and manufacture of your classic.

Penrite oils are blended from high quality base stocks, combined with additives selected to give the best performance and reduced oil consumption whilst giving better oil pressure, increased engine protection and reducing the build up of sludge deposits. Penrite's philosophy of meeting and exceeding original requirements extends across their range of lubricants. Other lubricants and sizes from the Penrite range are available on our website.

1

Running-in oil

Penrite running-in oil is designed to promote and control the bedding-in process of newly built engines. It should be used for the first 300 miles and then replaced with the appropriate grade of HPR oil.

- 1 Running-in oil 5lt
GGL9014X£32.95

2

Classic (20W-50) engine oil

Designed specifically for vehicles from the 1960's and 70's, this 20W-50 multi-grade standards. Like the original 20W-50's of the 1960's, classic 20W-50 is a full-bodied, hard-wearing oil giving excellent film strength under the heaviest loads.

- 2 Classic 20W-50 5lt
GGL9044X£24.95

3

4

Heritage engine oil

This range of oils is for early lubrications requirements such as total loss, wick feed, mechanical and early pressure fed systems up to 1920. Ideal for Veteran & Edwardian cars, stationary engines and agricultural machinery.

Trans gear manual transmission fluid

Blended for modern gearboxes & transaxles which require a manual transmission fluid (MTF) such as MG, Mazda MX-5, Land Rover & Honda models. Also suitable for older manual gearboxes that require automatic transmission fluids. This semi-synthetic oil is blended with additives that improve the gear shift feel, reduce oxidation and enhance wear protection. API GL-4 specification and replaces 5W-30 or 10W-30 engine oils where recommended.

- 16 Manual transmission fluid 75W-80 (MTF) 1lt .GGL9141X£14.95

Mild EP

Extreme pressure gear oil meeting the requirements of GL4. Designed for use in spiral bevel, worm and pre-1960 hypoid axles. Also for use in the steering racks of many 50's and 60's cars, and gearboxes where some extreme pressure protection is required. Compatible with all copper alloy components.

- Mild EP 5ltGGL9077X£28.94
- 17 Mild EP 1ltGGL9017X£7.94

Auto DXII

Automatic transmission fluid meeting Dexron II. Used in many automatic transmissions, some power steering units and hydraulic systems.

- 18 Auto DXII 1ltGGL9126X£8.95

Penrite general products

Engine assembly lube

Use during engine assembly to protect cam lobes, followers, rockers, push rod ends, bearings and thrusts through initial fire up. Do not use on pistons and rings as it may prevent the bedding in process.

- 19 Engine assembly lube 40gGGL9031X£6.95

Steering box lube

A self levelling high viscosity lubricant containing non corrosive EP additives. Designed for use in steering boxes, not for use in rack and pinion steering systems.

- 20 Steering box lube 500mlGGL9028X£6.95

Shock absorber oil

Designed for use in lever arm and vane type shock absorbers. Shock oil 1 is a light SAE20, suitable for normal use in Armstrong lever arm dampers. Shock oil 2 is a heavy SAE20 that increases the damping rate and is more suited to fast road and competition use.

- 21 Shock oil 1 500mlGGL9038X£6.95
- Shock oil 2 500mlGGL9039X£6.95

Carburettor damper oil

Specially designed for use in SU or Stromberg carburettors.

- 22 Carburettor damper oil 150mlGGL9035X£3.95

Semi-fluid grease

Self-levelling extreme pressure grease with anti-wear and anti-corrosion additives. Excellent for Land Rover front swivels.

- 23 Semi-fluid grease 500mlGGL9029X£6.95

Water pump grease

No. 4 calcium grease, made for water pumps that require regular greasing.

- 24 Water pump grease 500mlGGL9034X£3.95

High melt bearing grease

Lithium complex base grease designed for use in classic and vintage wheel bearings where exposure to water resulting in grease wash out was a problem.

- 25 High melt bearing grease 500gGGL9040X£6.95
- High melt bearing grease 400g cartridgeGGL9203X£5.95

Graphite grease

Highly water resistant grease suitable for general lubrication work. Recommended for lubricating leaf springs and wire wheel splines.

- 26 Graphite grease 500gGGL9030X£6.95

Copper-Eze

Copper grease ideal for use as anti-seize lubricant for general hardware and wire wheel splines.

- 27 Copper-Eze 500gGGL9204X£6.95

New Moss branch opens in France

Moss is pleased to announce the acquisition of British marque specialist, Motor Dream of Paris, France. In 2014, 'Moss Motor Dream Paris' will join our four UK branches, London, Bradford, Bristol and Manchester.

The acquisition of Motor Dream will provide Moss with a branch in Europe enhancing our service to European customers. British classic car enthusiasts in Europe will now have easy access to our extensive parts range for British classic cars.

TOOL-14A. Important notification of prices for 2014

Due to the volatility of world markets and currency fluctuations the prices in this catalogue are subject to change. Moss make every attempt to keep prices competitive and stable, however in common with all other suppliers in our industry, we reserve the right to alter these prices without prior notice. For the latest prices, please visit our website moss-europe.co.uk. Printed in the U.K. All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, photocopying, recording or otherwise without prior written consent of Moss Europe Ltd. Please note: Product colours may vary slightly to samples featured in this catalogue, due to the limitations of colour printing.

All prices are per unit (unless otherwise stated) and include (UK) VAT at 20% (where applicable). Please note EU countries may be charged at their local VAT rate, countries outside the EU will not be charged VAT. See the ordering information or our website for further details. Prices are correct at the time of going to print, postage & packaging is not included. E&OE.

Hazardous Goods: At the time of going to print, Moss Europe Ltd conforms to international shipping regulations regarding packaging and transportation of Hazardous Goods by road and sea freight (only). Due to these international shipping regulations and licencing rules all goods deemed as Hazardous are currently available for shipping to the UK and Europe only. If you place an order containing Hazardous goods and your shipping address is not in the UK or Europe, we will not be able to ship this item to you. Please contact your local branch or visit our website moss-europe.co.uk for the latest delivery information of Hazardous goods.

BOOKS & MANUALS

Original technical publications heritage DVD

Original Technical Publications for heritage cars have now carefully reproduced a range of DVD's using historical archives. Extensive research has allowed access to original Heritage publications needed to maintain your classic. Now owners and enthusiasts can have easy access to original publications, including parts catalogues, service manuals and owner's literature.

CUTTING

Aviation snip set

This set of three long nosed shears offers the ease of compound leverage to cut through thin sheet metal up to 1.2mm (18swg). Suitable for cutting straight (yellow), left (red) or right (green) curves.

- Aviation snip setCTR007£8.35

Tapered hole cutter

This set of three high speed steel bits is ideal for drilling holes in a variety of materials, especially thin sheet metal, fibreglass and most plastics. The stepped feature allows holes to be drilled to a precise width without the need for drilling a pilot hole or gradually increasing the diameter of drill bits used.

- Tapered hole cutter stepped set (3 piece) 4-30mm .CTR010£35.95

Dura-block

Getting a repair just right for painting can take time. These dura-blocks are available in 2 sets of various contours and shapes allow you to easily sand primers and fillers to eliminate dents and ripples. Also available singularly, see our website for full details.

- Dura-block long kit (3 piece)012-084£94.96
(Contains 3 flat blocks: 012-075 - 67mm x 360mm, 012-080 - 67mm x 610mm, 012-081 - 67mm x 760mm).
- Dura-block short kit (5 piece)012-083£45.95
(Contains assorted blocks: 012-073 - flat 35mm x 280mm, 012-074 - flat 67mm x 140mm, 012-076 - round 30mm x 280mm, 012-077 - flat 63mm x 77mm, 012-079 - tear drop 300mm).

Sanding block

Ergonomic foam block adapts to curved work surfaces for a smooth finish. For use with 150mm dia hook and loop sanding discs. Includes 3 discs 40, 120 and 240 grit.

- Sanding blockMTR543101£6.25

See page 32 for sanding discs.

Tin snips

Straight cut tin snips designed for cutting cold rolled sheet steel up to 0.8mm thick. Hardened and tempered drop forged high carbon steel blades, moulded handle grips for secure use.

- Tin snips - 10"MTR142101£8.35

Hand nibbler

This hand operated nibbler can be used for straight or curved cuts and works by cutting a narrow parallel section through sheet material. This cutting action means that the remaining metal is left undistorted; ideal for removing damaged metal to allow letting-in of a repair section to an existing panel. Holes can be cut in a panel from a pilot hole of 6mm (1/4"). Cuts a maximum of 1mm (20swg) mild steel, 1.2mm (18swg) aluminium, brass or copper.

- Hand nibblerCTR003£8.35
- Replacement blades for nibblerCTR004£4.75

Clarke

Bench shears

A quick and easy way to cut mild steel sheet up to 1.5mm (16swg). Once mounted onto a bench or into a vice, the long handle enables controlled movement of the wheel to cut straight, curved and internal corners. (Vice not included).

- 1 Light duty bench shearsCTR001£47.95
- 2 Bench viceMTR3100£47.95

DRILLING

Clarke

Spot weld drill set

Effectively and cleanly removes spot welds. The tip locates in the dimple, preventing skipping, in the spot weld and drills through one layer of the weld leaving the flange below intact.

- Spot weld drill set (4 piece)LT3506£20.95

Clarke

Drill bit sets

High quality Zirconium coated metric drill bit sets for improved wear resistance, up to 10 time longer than HSS.

30 piece set

Metric sizes - 1.0mm to 13.0mm
Strong metal indexed storage case

- 1 Drill bit set (30 piece)
MTR221801£23.95

16 piece set

Metric sizes - 1.5mm to 10.0mm
(2 of 1.5, 2.0, 2.5mm)
(1 of 3.0, 3.2, 3.5, 4.0, 4.5, 5, 6, 8, 10mm)
Robust plastic storage case

- 2 Drill bit set (16 piece)
MTR221802£13.15

METALWORKING

Clarke

Welding jigs

These useful magnetic jigs are designed to hold your work pieces during welding. Two types are available; a fixed type with different preset angles on each side, the adjustable type can be adapted to suit work requirements.

- 1 Adjustable jigCTR099 ..£14.45
- 2 Fixed angle jigCTR100 ..£17.95

Welding clamp sets

These two sets of welding clamps are ideal for clamping work to prevent movement before welding or rivetting. Professional quality construction with adjustable tension and a positive locking action,

supplied in two sets of either locking clamp set or C clamp set.

- 1 C clamp set (3 piece)CTR097 ..£19.96
- 2 Locking clamp set (3 piece)CTR098 ..£13.55

Clarke

Double headed nibbler

Use with any powered drill for simple cutting of sheet material into intricate shapes & profiles. Supplied with two cutting heads, safety handle & wrench in a metal storage case.

- Maximum cutting capacities:
 - Mild steel plate - 1.8mm.
 - Stainless steel plate - 1.2mm.
 - Copper/aluminium plate 2mm.
 - Plastic/fibreboard 2mm.
- Operating speed: 1500 - 3000rpm.
- Minimum cutting radius: 12mm.

- Double headed nibblerMTR223301 ...£35.95

Spot weld cutter set

A useful set for vehicle body repairs. The M35 spot weld drill cuts through existing spot welds and releases damaged panels. The mill cutter is suitable for drilling out spot welds on most vehicle panels including galvanised, boron, high stress steels and allows the removal of

the top panel only, leaving the back panel intact. The pilot pins ensure accurate cuts.

Set includes:

- 1 x M35 spot weld drill (8mm dia).
- 1 x mill cutter (10mm dia).
- 6 x double ended hole cutters.
- 2 x pilot pins.

- Spot weld cutter setMTR221803 ...£21.55

Drill bit sharpener

Quick and easy to use with a built-in drill bit guide ensures sharpening at the correct angle. Suitable for 3mm to 10mm drill bits. Please note this machine is only suitable for sharpening single drill bits at a time.

- Voltage: 230V ~ 50Hz.
- Wattage: 70W.
- Speed: 1600rpm.

- Drill bit sharpenerMTR221901 ...£26.45

Clarke

METALWORKING

Panel joddlers Clear-Trace

When joining two panels or letting in a repair section, edge setting or joddling one of the panels allows you to overlap the panels for a flush fitting joint. Our joddlers include; a standard type and one that features a hole punch suitable for producing small holes for plug welding.

- 1 Panel joddler & hole punch CTR017£52.94
- 2 Panel joddler CTR016£47.95

Wing finisher Eastwood

This tool is ideal for simple dressing of wheel arch lips if wider wheel & tyre combinations are being fitted. The unique design allows wheel arch lips to be modified without having to remove the wheel. Gently heat the paint with a warm air gun and use the Wing finisher to turn up the edge. Featuring a pressed steel frame, moulded hand grips & rubber pads (spare pads included) to prevent damage to the painted surface.

- 012-260£44.95

Door skinning tool

Suitable for pre-forming and finishing doors skins onto door frames. It can also be used for joining sheet metal. Fitted with nylon pad to prevent panel deformation.

- Door skinning toolMTR524101£92.95

Intergrips

Intergrip clamps allow you to grip sheet metal and butt weld repair panels in wings, floors etc. Designed to be used on any shape panel they hold the pieces edge to edge with a small gap to allow for full weld penetration. Firstly tack the two sections together then remove the Intergrips to allow completion of the job leaving an excellent joint with little dressing needed.

- Intergrip set (5 piece)FROSTK350£14.95

Hand folders

Good for making folds and flanges in awkward areas, and where it's not possible to use a bench folding machine. These high quality tools have machined jaws to ensure a good grip and accurate straight fold. Two sizes available.

- Hand folder 1" jawFROSTF271£42.95
- Hand folder 3.5" jawFROSTF270£45.95

Professional hammer & dolly set Eastwood

Ideal for the demanding yet value-conscious enthusiast who expects high quality materials and workmanship, along with superb balance and feel. Tools feature polished and hardened working surfaces for precision metal shaping and maximum durability. Cushioned fibre glass handles are securely mounted to the heads to last a lifetime; this set includes the most commonly needed profiles and shapes packaged in a durable moulded plastic case.

- Professional hammer & dolly set (7 piece)012-078£69.95

Sheet metal mallet set Eastwood

Eastwood's blue ultra-high-molecular-weight plastic mallets stretch and form sheet metal. Screw secured head captures handle within for proper fit and allow the head top to be used for forming.

- 3 Teardrop Mallets (2", 2-1/2", 2-3/4" dia)
- 3 Round Mallets (2", 2-3/4", 3-1/4" dia)
- Hickory handles

- Sheet metal mallet set (6 piece)012-186£142.94

Hammer & dolly set Clear-Trace

This 7 piece drop forged set is perfect for knocking out those dents and shaping small repair sections. The set contains 3 hammers and four dollies of the most useful head shapes with polished striking faces.

- Hammer & dolly set (7 piece)CTR018£32.95

Bench top English wheel

Fabricating compound curves in sheet metal is easier with an English wheel. Ideal for shaping body repair panels, motorcycle parts, etc, allowing smooth effective shrinking & stretching of up to 16 gauge material. The sturdy, collapsible construction of this unit makes it ideal for the home workshop as it can

be stored away when not in use. accurate cuts.

Set includes:

- Throat depth = 20" & Throat height = 18".
- Includes a large wheel (8") and an anvil wheel (5").
- Micro-adjuster for precise control.

■ Bench top English wheel012-188£379.96

Dent pullers

Dent pulling can be easily done with these two tools. This solidly made slide hammer kit is effective as a single sided approach to the task of removing dents in vehicle bodywork and comes with a variety of hooks to suit panel edges & profiles. The rubber suction cups have finger grips for pulling minor dents on large panels, where light force is required. Also useful for handling sheet materials and glass!

- 1 Slide hammer setMTR491501£25.96
- 2 Suction dent puller set (3 piece)FROSTF285£18.20

Panel beater sandbag

Using a sandbag with a mallet is the ideal way to beat and shape metal panels without nicks or gouges, and with minimal stretching. The sand bag provides the sheet metal work piece with support and flexibility by deforming with the work piece under mallet blows allowing your work piece to be formed into shape. Supplied empty simply add dry sand to the panel beater bag. Suede finished cowhide & all-leather construction with double-stitched, glued seams. Supplied empty, the hook-and-loop closure makes it easy to fill through a funnel with dry sand or steel shot. 18"x18".

■ Panel beaters sandbag012-262£32.95

Bead roller

Here's a great value tool for the beginner metal worker. Just mount this tool in your vice, attach handle and you're ready to raise ridges in floor panels, doors and more, for strengthening and style. This bead roller features a sturdy 1/2" backing plate, 17" deep throat, adjustable guide fence, hand crank and greasable shaft bushes. Also includes 1/16", 1/8", 1/4" flanging mandrels, 1/4", 3/8", 1/2" bead mandrels.

■ Bead roller012-189£149.95

Folding machine

This simple folding machine is ideal for home restorers as its compact size means it can be stored away when not in use. It's ideal for producing repair panels and general metal fabrication, and will bend 0.7mm (22swg) steel up to 90° and a length of 615mm.

- Vice mounted folding machineCTR014£51.95
- Bench viceMTR3100£47.95

Shrinker and stretcher

Eastwood's 'Starter' Shrinker/Stretchers set helps make metal-shaping jobs easier letting you easily fabricate gentle radius bends and contours in steel, aluminium, stainless or copper. Compound leverage lets you form effortlessly, without making relief cuts, heating, or hammer-forming. Reproduce wheel arch flanges, compound dog legs, trunk corners... in fact anything combining curves and angles. Set includes a single sturdy body, handle and interchangeable jaws. A must for the DIY restorer. Works up to 18-gauge mild steel, 20-gauge stainless, and 16-gauge aluminium.

■ Shrinker/stretcher set012-184£134.95

METALWORKING

Slip roller

This Eastwood 12 Inch roller can help you recreate a variety of parts including repair panels and any other piece of sheet metal requiring a curve or rolled bend. Designed for use on sheet metal for creating bends, cones or cylinders, and grooves in the roller also allow for shaping wire.

- Slip roller012-261£209.95

Tubing notcher

Getting tube joints correct can be difficult without the right equipment. Strong 'fish mouth' joints depend on precisely cut tubing. Trying to fill a poor joint with a thick weld bead not only looks bad, but can lead to disastrous joint failure.

This notcher provides accurate alignment for fast accurate cutting. They are particularly useful for those doing home or special builds where frame or wishbone construction is included. Both types either bolt to workbench or fit in a drill press. Requires hole saw set (MTR5056) sold separately.

- Holds up to 2" diameter round tube.
- Create precise 'fish mouth' joints.
- Heavy duty construction.
- Double axis mounting base.
- 1° scale and indicator.

- 1 Tube notcher
012-182£69.95

Hole saw set

This 6 piece hole saw set includes: 16, 19, 25, 32, 38 and 51mm cutters.

- 2 Hole saw set (6 piece)
MTR5056£23.95

CLEANING & STRIPPING

ABRASIVE CLEANING

ANGLE GRINDER
ABRASIVES SEE PAGE 32

Angle grinder

An invaluable tool for car restoration. This compact 115mm (4.5") angle grinder is suitable for use with grinding or cutting discs & abrasive wheels and brushes. M14 spindle & 22mm disc bore adaptors, double insulated casing, spindle lock for easy disc changing, soft rubber grip, safety on/off switch, side handle.

- 1 Angle grinder 115mmMTR222101£23.95
- 2 Grinding discs - standard (10 pack)MTR3038£9.46
- Cutting discs - standard (10 pack)MTR3037£7.45

- Cutting discs - plasma thin 1.2mm (10 pack)MQC221101£1.45

Blast cabinet

This compact & effective blast cleaning system removes surface corrosion and old coatings, revitalising old components ready for refinishing.

- Use aluminium oxide for cleaning steel or glass beads for cleaning aluminium.
- High visibility & protective top viewing screen.

- Low voltage (12v) internal light with mains transformer plug.
- Can be used with in conjunction with a vacuum extractor system
- Includes extra filter for cleaner exhaust.
- Air consumption - minimum 10cfm at 8bar.
- Dimensions (LWH) 580x480x490mm.

- Blast cabinetMTR303101£149.95

Spot blaster kit

Eastwood

This compact hand-held spot blast gun is ideal for treating stone chips and small areas of corrosion or coating removal. Using a recirculating air system contains the media in the gun for clean operation, used media is returned to the bag. Supplied with a set of shaped rubber nozzles for sealing the gun head to the panel to prevent media loss.

- Spot blaster kitMTR303201£17.95

Soda blasting

Soda blasting is the perfect way to remove old paint from classic car bodywork. A common problem with abrasive blasting on metal body panels is distortion from the heat and pressure, removing paint layers with soda leaves the substrate clean and localised spot abrasive blasting can be done to remove remaining rust, reducing the chance of distortion.

Soda blasting can be used to remove paint without harming sheet metal, fibreglass, glass, or chrome, it also leaves a thin film of soda over the panel which prevents initial rusting, recoating is recommended as soon as possible, treat with Fast Etch (Part No: 012-227). Also suitable for numerous cleaning tasks including marine

Eastwood soda blaster

This single tank unit can be converted for use with either soda or abrasive media blasting using included parts. This is a great entry level blasting systems.

- Soda blaster with single tank012-200£219.95

Eastwood soda and abrasive blaster

The twin tank system provides the best of both worlds. You can select or combine media to best suit the job. Eastwood's unique mixing valve system allows you to switch/mix 'on the fly' giving an infinite ratio between soda and abrasive media. It simply blasts through paint, heavy scale rust & multiple coatings simply and without fuss. This blasting system is a must for the home restorer!

- Soda & abrasive blaster with twin tank012-201£344.95

■ Soda & abrasive blaster uses Eastwood's innovative 'media mixing valve'.

CHEMICAL STRIPPING

Paint & powder stripper

Eastwood's Paint and Powder Stripper easily and effectively removes most stubborn paints and powder coatings. Simply apply the stripper to the surface and let it's aggressive stripping action go to work; a few minutes later use a scraper to remove dissolved paint or powder. Works on most metals and factory fibreglass.

- 1 Paint & powder stripper - 13oz US gal (3.7lt) . . .012-267£59.95
- 2 Paint & powder stripper - 13oz aerosol (384ml) .012-265£11.95
- 3 Paint & powder stripper - quart (946ml)012-266£26.95

anti-foul, mould, graffiti and grease removal from a variety of surfaces such as concrete & glass.

Normal commercial soda blasters use high air volume, but Eastwood has developed two systems to allow the home and light commercial user to soda & abrasive blast with ease. Both units are manufactured from all steel welded top-loading, large capacity (100lb/45kg) hoppers with pressure gauge and safety valve, all mounted to a sturdy frame. The soda/media is delivered through an 8" (2.4M) blast hose with a deadman valve for safety, and the units require as little as 7cfm at 80 psi, making them ideal for use with smaller compressors.

Blasting consumables and parts

We offer a range of blast media and replacement parts for these blasters.

- Soda media - medium grade 50lb/22.7kg bag . . .012-202£39.95 (Ideal for light duty cleaning uses).
- Soda media - large grade 33.3kg bag012-203£31.94 (Recommended for paint removal and heavy duty cleaning uses).
- Abrasive media - fine grade 25kg bag012-213£14.95 (This is an aluminium silicate general purpose abrasive blast media ideal for restoration abrasive blasting and is silica free & non-toxic. It can be re-used if collected & sieved).
- Media sieve012-209£14.95
- Replacement nozzles - 2mm (3 pack)012-207£9.95
- Replacement deadman block012-250£6.76

After blast

Eastwood's After Blast is a unique surface preparation for freshly blasted steel. After Blast cleans, degreases and etches just-blasted or newly-sanded metal to improve adhesion for painting, priming or powder-coating. Simply spray on, wipe and repeat until clean. The aqueous cleaners and phosphoric acid clean and etch the metal, zinc phosphate coating improves paint, primer or powder adhesion. Also protects against flash corrosion.

- After blast US gal (3.7lt)012-255£42.95

PARTS CLEANING

Bench top washer

Cleaning parts prior to restoration is easy with a parts washer. This compact unit is designed to be used on your workbench and features a 10 litre tank and 1000 litre/hour pump delivering cleaning fluid through a flexi-nozzle exactly where you need it. Use with the bio-degradable citrus based cleaner.

- 1 Bench top parts washerMTR3130£47.95
- 2 Cleaning fluid 5ltMTR3131£11.95
- 3 Parts cleaning brushDMR38860£3.50

Hand wire brushes

Ideal for removing rust, old paint and dirt from any surface.

- 1 Wire brush 4 rowCTR031£2.35
- 2 Wire brush 5 row with scraperCTR032£2.35

RUST PREVENTION

Cavity wax injector kit

This air powered cavity wax injector kit features an extension probe to allow easy access to sill, chassis rails and other cavities throughout the car, the probe end features offset holes to ensure wide coverage within the cavity.

The optional extension probe has a rigid lance for accurate application of wax. The gun features 1/4BSP air line fittings, requires maximum 13.4 cfm. Suitable for use with proprietary rust inhibitor waxes.

- 1 Cavity wax injector kitMTR3017£47.95
- 2 Extension probeMTR30171£30.95

DEGREASERS

Gunk

The ever popular degreaser.

Fuel tank cleaner etching fluid & sealer

Bill Hirsch miracle heavy duty industrial cleaner. Suitable for use on non-absorbent surfaces, it will clean steel, aluminium, brass, bronze and chrome. Use this to clean out gummy petrol tanks prior to sealing with slushing compound.

Once you have cleaned out your original tank or bought a new tank use the etching fluid to ensure you get the maximum effect by preparing the surface for optimum bonding. Then use the slushing compound to coat the inside with a highly protective film to prevent rust, this will even seal minor leaks.

- 1 Heavy duty cleaner 1 US gallonGAC9858X£22.96
- 2 Etching fluid 16fl ozGAC9859X£12.40
- 3 Slushing compound US quart608591A£28.96

Internal frame coating

You spend time and money restoring the outer surface of your chassis, but what about all that rust inside the chassis? Eastwood's Internal Frame Coating destroys rust hiding inside the chassis, so it doesn't rust its way through. The tough phenolic resin penetrates, converts and encapsulates the rust on the internal surfaces of the chassis and zinc phosphate seals it to prevent future corrosion. Available in aerosol or quart; the aerosol includes a 24" extension tube and radial pattern conical nozzle it gets into all those awkward areas of the inner chassis. One can covers approximately 10 sq.ft and fully cures in 24 hours. It would typically take 3 cans per chassis. Quart supplied for use with cavity injector equipment.

- 1 Internal frame coating aerosol (384ml)012-244£16.94
- 2 Internal frame coating quart (946ml)012-246£39.95

Rust converters

Eastwood's unique Rust Converter is formulated to transform surface rust into an inert paintable surface. This surface is best painted with Eastwood's Rust Encapsulator or Chassis Black for a tough durable finish.

The formulation is thin enough to flow into cracks and panel joint seams. In aerosol form it is ideal for use on floor pans engine compartments and hard to reach areas.

- 1 Rust converter aerosol (384ml)
012-240£16.94
- 2 Rust converter quart (946ml)
012-241£24.95
- Rust converter US gal (3.7lt)

Rust encapsulator

Rust never sleeps, unless sedated with Eastwood rust encapsulator. Rust encapsulator has been lab tested and found to be more effective than well known brands for UV resistance, preventing rust creep, and overall durability.

From coating external body sheets metal, to frames and floor pans, Eastwood rust encapsulator is preferred by a growing number of shops and home enthusiasts. It can withstand temperatures of up to 200°C (400°F).

This is one of the best defences against corrosion for classic cars. This product is acid, lead, chromate and isocyanate free.

Rust dissolver

- Safe to use & acid free
- Only removes the rust
- Suitable for engine parts

This is a safe, acid free rust remover ideal for all components on your car - it removes rust, not metal and leaves the metal ready to paint, plate or powder coat. The gentle formula makes it suitable for engine parts, parts can remain in contact with Eastwood rust dissolver without damage. Rust dissolver is also harmless to copper, brass, aluminium, solder, lead, plastic, rubber, seals, wood or vinyl. It will not remove paint and chrome that adheres to the surface, but removes bluing and other oxide coatings. One US gallon de-rusts about 20 square feet. Available in liquid or gel formulas. Gel is ideal for larger panels where submersion is not possible.

Waxoyl rust protection

Probably the most effective aftermarket rust prevention treatment available. Waxoyl is designed for use in cavities such as sills, chassis leg and wheel arches to provide anti-rust protection. It spreads evenly over the applied surface forming an effective seal against the environment.

Underbody seal

This proven product provides protection to the underbody areas of your car such as wheel arches, inner wings, sills and floors. It can be applied to areas at risk of damage from stones, grit, road salt and water to provide a tough flexible barrier, with added Waxoyl for rust inhibiting. Easily applied by brush, aerosol or using the underbody seal gun, see page 43.

Surface corrosion protection

PROtech

PROtech-1 is a transparent surface coating providing excellent corrosion protection. It is VOC free and uses nano-technology solutions to give long lasting surface protection. **PROtech-1** gives a dry transparent finish and exceptional supplementary surface corrosion protection. Ideal for use on polished and chrome components, electrical fittings and engine bay applications. Because the chrome retains its shine, it is perfect for use on bumpers, overrides, alloy rocker covers etc to give everyday corrosion protection. More information is contained in the PDF links.

PROtech-2 is the next generation surface coating and offers superior corrosion protection. It is suitable as supplementary corrosion protection for extended storage periods and to protect items used in inclement environs. **PROtech-2** is a penetrating wax based surface coating and anti-rust agent, which offers a dry, flexible film finish (easily removed with PROclean-Gold). Use **PROtech-2** for all your electrical connectors and relays, bumpers, grilles, brightwork etc to help stop corrosion problems especially whilst storing your classic.

PROclean-Gold is a 100% natural, plant based degreasant and cleaner. **PROclean-Gold** is easy to use, non irritant, VOC free and 100% solvent free. Ideal for use on metals, glass, leather, wood veneers and fabrics (check colour fastness in non visible area before use). Effectively removes dirt, grime and grease to create a clean grease free surface. It is also an exceptional degreasant for preparation of paintable surfaces.

PROtech Key features:

- Moisture repellent.
- Salt & acid resistant.
- For use on all metals including chrome and anodised aluminium.
- Excellent adhesion to polished surfaces.
- Can be applied to rubber and plastics (no overspray issues with wood and glass).

Leading noise and heat

Dynamat Xtreme

A highly efficient, composite material designed to reduce noise & vibration through panelwork. It is made from butyl rubber with an aluminium foil layer and a self adhesive backing. The vibration and noise damping qualities make your car feel solid & create a luxury car feel; doors close with a reassuring clunk and no tinny rattles. Road noise is also reduced so cruising is a more relaxed experience. Recommended usage: Use on interior panelwork. Idea for floor pans, bulkheads, inner wings, inside roof panels & hard tops, doors, bonnet & boot lid. A minimum coverage of 30% panel area, centrally positioned, is recommended to reduce panel vibration and noise.

- **Dynamat Xtreme - speaker pack, 2 sheets**
GAC90511£12.95
Pack contains 2 sheets of 254 x 254mm 0.13sqm (10" x 10" 1.4sqft)
- **Dynamat Xtreme - hex pack, single sheets**
GAC90512£19.95
Pack contains 1 sheet of 457 x 812mm 0.37sqm (18" x 32" 4sqft)
- **Dynamat Xtreme - door pack, 4 sheets**
GAC90513£69.95
Pack contains 4 sheets of 305 x 914mm 1.12sqm (12" x 36" 12sqft)
- **Dynamat Xtreme - bulk pack, 9 sheets**
GAC90514£149.95
Pack contains 9 sheets of 457 x 812mm 3.34sqm (18" x 32" 36sqft)
- **Dynamat Xtreme - mega pack, 9 sheets**
GAC90515£359.90
Pack contains 9 sheets of 609 x 1219mm 6.68sqm (24" x 48" 72sqft)

Dynamat Superlite

A light weight alternative to Xtreme. With excellent noise, vibration & heat reduction characteristics but 30% lighter than Xtreme.

- **Dynamat Superlite - tri-pack, 3 sheets**
GAC90521£50.95
Pack contains 3 sheets of 457 x 812mm 1.11sqm (18" x 32" 12sqft)
- **Dynamat Superlite - bulk pack, 12 sheets**
GAC90522£189.95
Pack contains 12 sheets of 457 x 812mm 4.45sqm (18" x 32" 48sqft)

Dynadeck

Dynadeck is a weather proof and wear resistant material ideal for replacing carpet, hardura and rubber type materials in classic cars. Dynadeck combines a 1/8" thick embossed, textured vinyl covering with a 1/4" Dynaliner backing. Non-adhesive so it can be removed for cleaning etc.

- **Dynadeck - 3/8" thick, 6ft**
GAC90552£349.96
Pack contains 1 sheet of 1370 x 1820mm 2.5sqm (54" x 72") 27sqft
- **Dynadeck - 3/8" thick, 12ft**
GAC90554£629.95
Pack contains 1 sheet of 1370 x 3650mm 5sqm (54" x 72") 54sqft

Recommended usage: Use over the top of Dynamat Xtreme or Superlite but under carpets & behind trim. Ideal for floor pans, bulkheads, inner wings, inside roof panels & hard tops, doors, bonnet & boot lid. See website for more information.

- **Dynaliner - 1/8" thick, single sheet**
GAC90531£39.95
Pack contains 1 sheet of 813 x 1372mm 1.12sqm (32" x 54" 12sqft)
- **Dynaliner - 1/4" thick, single sheet**
GAC90532£59.95
Pack contains 1 sheet of 813mm x 1372mm 1.12sqm (32" x 54" 12sqft)

insulation products

DynaPad

DynaPad is a four layer composite barrier for extra hard to control noise problems. It is a heavy, one pound per square foot mat for use on diesel truck floors and car audio installations. DynaPad has a vinyl barrier between two layers of acoustic foam and a waterproof poly facing. It has no adhesive so it can be reused.

- DynaPad - 3/8" thick, single sheet
GAC90571£134.95
Pack contains 1 sheet of 813mm x 1372mm
1.12sqm (32" x 54" 12sqft)

Hoodliner

Designed specifically for under bonnet insulation Hoodliner absorbs engine noise to help keep your car quieter. The aluminized skin creates a water & oil barrier that reflects up to 97% of radiant heat to protect the bonnet's paint.

- Hoodliner, 3/4" thick, single sheet
GAC90541£69.95
Pack contains 1 sheet of 813mm x 1372mm
1.12sqm (32" x 54" 12sqft)

Dynaplate

Dynaplate is a very thin, strong and light weight sound deadener. The solid aluminium sheet is self-adhesive. Use Dynaplate where space is an issue or to bridge openings in body panels. It's a great product to help turn a door into a speaker enclosure.

- Dynaplate - 1/100" thick, single sheet
GAC90561£224.95
Pack contains 1 sheet 609 x 762mm 1.39sqm
(24" x 30" 15sqft)

What is Dynamat?

Dynamat is the leading range of noise and heat insulation products. If your car is too noisy & hot Dynamat products can give your car the quiet, cool quality feel you deserve.

COOL & QUIET

HEAT & NOISE

Why Dynamat?

- Deadens panel vibration
- 10 x times more damping than anything else on the market
- Reduces road noise
- Reduces heat soak from engine & exhaust
- Non absorbent materials
- Self adhesive 'peel & stick'
- Easily cut & moulded to fit
- Long lasting & superb adhesion

How Much Dynamat?

Calculate the area of the vehicle you want to cover...

100% COVERAGE - Full coverage for the best results...
If the car is stripped out this is a great time to go for 100% coverage.

50% COVERAGE - Great sound & heat insulation...
Cover 50% of your car's interior panelwork giving you a cooler & quieter car...

30% COVERAGE - Significant reduction in noise...
Cover 30% of the panel's area with a centrally positioned piece of Dynamat to significantly reduce noise...

Where should I use Dynamat?

There are 2 Steps to a quieter, cooler, better feeling great car...

Combine Dynamat with Dynaliner and you get a the benefits of both products.

Step 1 Dynamat - deaden the noise

Apply Dynamat to all the accessible interior panels of your car. Dynamat is best for noise reduction with some heat reduction... Start with firewall/bulkheads, gearbox tunnel, front floors, doors, rear floors, roofs, wheel arches, under bonnet, boot lid.

Step 2 Dynaliner - insulate against heat

Apply Dynaliner over the top of Dynamat to reduce heat soak by up to 70%. Also helps with noise reduction.

HEAT INSULATION

Manifold heat insulation

Excessive heat build up in the engine bay can cause premature failure of components, and leads to poor engine running due to reduced inlet air density. Excess heat in the engine bay can also cause fuel cavitation.

Wrapping a tubular manifold will keep engine bay heat to a minimum, reducing temperatures by up to 70%. Thermo-Tec is made from Silica based yarns capable of withstanding up to 1000°C. As a guide a 2" x 50' roll will cover approx. 13 ft of 2" pipe. Supplied in various sizes, see below for details.

Roll size (w x l)	Natural	Black
■ 1" x 15' rollGAC150£11.95	GAC151£13.94
■ 2" x 15' rollGAC152£19.94	GAC153£21.95

- reflects 90% of the radiant heat

Exhaust system heat insulation

Exhaust heat shield can be used on the underside of the floors where the exhaust runs close to the floor particularly above silencers and catalytic converters. It effectively reflects 90% of the radiant heat from exhausts and can withstand temperatures up to 1000°C.

The general purpose material can be used to cover bulkheads and floors to keep general heat transfer to the cockpit to a minimum. It can also be used to wrap and cover components in the engine bay to prevent heat damage.

■ Exhaust heat shield 40" x 24"GAC184£78.95
1 General heat shield 1m x 1mGAC185£71.95

Foil heat shield

This foil covered heat and sound deadening material can be installed under carpets, over the transmission tunnel, against bulkheads, etc. Insulates against hot and cold, deadens noise and provides protection against fire. The insulation material is lightweight, has a layer of foil on both sides and will not absorb moisture.

■ Foil heat shield 1.21m x 1.82m (48" x 72")409-016£29.95

PAINTS & COATINGS

SPECIALIST COATINGS

Metal blackening kit

Lets you apply factory finishes at home! Auto makers have long used black oxide as an attractive coating for hardware. This economical black semi-gloss finish is often used on latches, hardware, brackets and many other automotive parts. Now you can reproduce the OEM look of black oxide at home! Not a paint or dye, Eastwood's metal blackening system provides a true OEM-type coating on any iron or steel part. It's safe and simple! Each piece takes only minutes to transform. The kit contains everything you need for a great finish.

1 Metal blacking kit012-048£41.95
■ Replacement metal black concentrate012-049£16.94

Zinc coatings

Use zinc phosphate to reproduce the charcoal grey plating effect used on throttle, gear lever, anti-roll bar links. Use clear zinc to reproduce the blue grey effect used on a variety of components such as coil bracket, alternator fans, distributor vacuum advance units. Withstands temperatures up to 148°C (300°F). Clean with pre-painting prep for best results (012-042).

Hammerite paints

Hammerite paint is formulated to provide a tough barrier that provides long lasting protection against moisture and corrosion. It can be applied directly to de-scaled & de-greased rusty metal and is quick drying. Available in hammered or smooth finish.

- Hammerite aerosol (400ml) - blackMQC631201£7.75
- 1 Hammerite (250ml) - blackMQC631202£5.65
- Hammerite (750ml) - blackMQC631203£14.35
- 2 Hammerite (2.5lt) - blackMQC631204£37.85
- Hammerite 'smooth' aerosol (400ml) - blackMQC631301£7.75
- Hammerite 'smooth' (250ml) - blackMQC631302£5.65
- 3 Hammerite 'smooth' (750ml) - blackMQC631303£14.35
- Hammerite 'smooth' (2.5lt) - blackMQC631304£37.85

- X-ray quality welds.
- Reduces porosity.
- Prevents corrosion.

Bloxide weld through primer

Bloxide is the preferred weld-through primer. This aluminised de-oxidising primer insures X-ray quality welds. Promotes the formation of aluminium oxide at the weld site to reduce porosity. Prevents corrosion of coated steel surfaces for several months of outside storage.

- 1 Weld-through primer 12oz aerosol (340g)012-037£37.96
- 2 Weld-through primer quart (946ml)012-038£32.95

Chassis black

Chassis black is a durable coating that provides a smart finish to chassis and suspension components, giving excellent coverage and resistance to fuel, brake fluid, abrasion, chipping and temperatures up to 148°C (300°F). An average sized chassis, for example a TR, uses 3 to 5 aerosol cans for the entire chassis! For the best result use over clean bare metal with Eastwood chassis black extreme primer, can also be applied to Eastwood rust encapsulator, should not be used on standard type primers.

- 1 Chassis black original gloss 15oz aerosol (425g) .012-001£13.50
- 2 Chassis black original gloss quart (946ml)012-002£29.50
- 3 Chassis black original satin 15oz aerosol (425g) .012-003£13.50
- 4 Chassis black original satin quart (946ml)012-004£29.50

Extreme chassis black

With an improved epoxy formulation extreme chassis black gives 3 times the durability of the original chassis black.

- 1 Extreme chassis black primer 15oz aerosol (425g) 012-009£13.30
- Extreme chassis black primer quart (946ml)012-010£29.95
- 2 Extreme chassis black gloss 15oz aerosol (425g) .012-005£18.90
- 3 Extreme chassis black gloss quart (946ml)012-006£36.00
- 4 Extreme chassis black satin 15oz aerosol (425g) .012-007£18.90
- Extreme chassis black satin quart (946ml)012-008£36.00

Self etching primer

This easy to use aerosol etches and primes bare, rust-free metal in one step. Adheres to steel, aluminium, stainless steel, and galvanised steel and is compatible with virtually any paint or auto finish. This self-etching formula bonds better to bare metals than other aerosol primers. It is also a single-stage formula which requires no catalyst, making it even easier to use.

- Self etching primer 16oz aerosol (453g) - black . .012-027£15.30
- Self etching primer quart (946ml) - black012-028£24.50
- Self etching primer 16oz aerosol (453g) - grey . .012-025£15.30
- Self etching primer quart (946ml) - grey012-026£24.50

SPECIALIST PAINTS

Radiator paint

Standard engine paints are too thick for radiator use because they can interfere with heat transfer and block air flow between the cooling fins. Also, they tend to flake off radiator tanks - Eastwood's radiator paint helps solve this problem. Durable enamel formulation resists temperatures up to 250°F, fuel and chipping. One can covers approx 6 sq.ft. Available in either 85% gloss or a low sheen satin finish.

- Radiator paint satin black 12oz aerosol (340g) . .012-212£13.50
- Radiator paint gloss black 12oz aerosol (340g) . .012-211£13.50

Glyptal internal engine paint

- Keeps oil clean
- Allows oil to flow freely
- Highly recommended
- Acid and oil resistant

Recommended by high performance engine rebuilding books, Glyptal seals the tiny ports left in metal after bead blasting leaving the engine block interiors smooth. Helps keep the oil clean and flowing freely. Acid and oil resistant.

- Glyptal internal surface paint 12oz aerosol (340g) .012-035£47.95
- Glyptal internal surface paint quart (946ml) . . .012-036£47.95

High temperature paint

HYCOTE These paints are formulated for use in high temp application such as cast iron exhaust manifolds. It can also be used on wrapped manifolds; the extra resins and binders will help protect and preserve the insulation wrap from fluids and abrasion, apply paint after fitting wrap to manifold. Not suitable for use on an aluminised blanket surface.

- High temp paint (400ml) - black . .MRD1204£7.96
- High temp paint (400ml) - aluminium .MRD1205£7.96
- High temp paint (400ml) - red . . .MRD1206£7.96
- High temp paint (400ml) - blue . . .MRD1208£7.96
- High temp paint (400ml) - white . .MRD1210£7.96

Exhaust silver

This aluminium coloured coating is formulated to cover exhaust components from the manifold back, ideal for hanger brackets and tail pipes. Not recommended for manifolds, front pipes or catalytic converters. One can contains enough to cover 6 sq.ft.

- Exhaust silver 10oz aerosol (283g)£11.70

Golden cad kit

Easy 3 step paint process can be used on virtually any metal part providing a long-lasting rust protection, ideal for refurbishing door striker plates, and general brackets and engine bay components.

This kit includes the 3 step system aerosol cans of gold base coat, red zinc, and green zinc - enough to cover 6 sq. ft. It also includes a can of diamond clear[®] gloss (012-023) to ensure an enhanced appearance and durability. It can withstand temperatures of up to 120°C (250°F). For best results prime rusty metal surfaces with Eastwood rust encapsulator, prime clean bare metal surfaces with Eastwood self etching primer.

- Cadmium effect system kit with diamond clear lacquer .012-068£67.96
- Cadmium effect system aerosol gold base£26.95
- Cadmium effect system aerosol red tint£17.45
- Cadmium effect system aerosol green tint£17.45

Pre-paint preparation

Proper surface preparation is one of the most important factors in achieving a quality finish. This specially formulated pre-painting preparation removes dirt, wax, polish, grease, silicone, even road tar - ensuring a clean surface.

- Pre-paint preparation 12oz aerosol (425g)£11.26
- Pre-paint preparation quart 946ml£13.94

- Factory-like finish.
- Up to 120°C (250°F).

Under hood black

This semi gloss smooth paint is ideal for detailing all those brackets, clamps, pulleys and numerous other parts in the engine bay. It gives a factory-like finish without covering casting details and withstands up to 120°C (250°F).

- Under hood black semi gloss 12oz aerosol (340g) .012-013£13.94
- Under hood black semi gloss quart (946ml) . . .012-014£26.50

Caliper paint

Old calipers showing through a smart set of wheels can really let your car down. Its easy to tidy calipers up with this enamel paint product. The paint has an industry leading heat resistant capability of 480°C (900°F).

The kit includes: ■ 2 component high tech paint system ■ 1 can of brake caliper cleaner ■ 1 mixing cup ■ 1 application brush.

- 1 Caliper paint kit - red216-800£37.96
- 2 Caliper paint kit - yellow216-801£37.96
- 3 Caliper paint kit - blue216-802£37.96
- 4 Caliper paint kit - black216-804£37.96

High temp coating

This high temperature coating is designed to give manifolds and headers a smart custom look. Formulated for the extreme temperatures that manifolds & cylinder heads experience it can withstand up to 650°C. It cures to form a hard and durable long lasting finish. One can covers 6 sq.ft. 2 cans are recommended for tubular manifolds.

- 1 High temp satin black 11.75oz aerosol (333g)012-220£15.35
- 2 High temp stainless steel 11.75oz aerosol (333g) . .012-221£16.25
- 3 High temp satin grey 11.75oz aerosol (333g)012-222£16.25
- 4 High temp satin silver 11.75oz aerosol (333g)012-223£16.25

Silver cad system

This easy-to-apply, single step aerosol system has been specially formulated to recreate the look of actual silver cadmium plating. Perfect for coil clamps, alternator pulleys, carburettor and transmission linkage rods and much, much more! Withstands up to 120°C (250°F).

- Silver cad 12oz aerosol (340g)012-085£13.25

Chrome galvanised paint

This aerosol paint gives a finish that almost looks like chrome plating and is reflective enough to faintly see yourself in it. With a high distinctiveness of image, it's so reflective that normal gloss readings do not apply - approximately 30% as reflective as a mirror. Ideal for refurbishing lamp reflectors and using on under hood, chassis hardware and small brackets. Metallic enamel contains zinc for corrosion resistance and withstands temperatures up to 150°C. One can covers approx 6 sq.ft.

- Chrome galvanised paint 12oz aerosol (340g)012-228£13.94

Carb renew

Rebuilding your carburettors? Carb renew is the best way to refresh the look of tired carburettors during a rebuild. Whilst you have the carb stripped, this acrylic coating can be applied to restore the external surface of the carburettor with a natural matt finish (3-8% gloss) this fuel and additive resistant lacquer. Available in either bronze or silver in a 5oz aerosol can, enough to cover two square feet. Ensure the surface is clean for painting with pre-painting prep (012-042).

- 1 Carburettor paint 5oz aerosol (140g) - bronze012-044£12.55
- 2 Carburettor paint 5oz aerosol (140g) - silver012-045£12.55

Liquid chrome kit

Paint on chrome - the complete kit. This kit combines 8oz. of liquid chrome with 8oz. of liquid chrome clear. Now you can create a finish that closely resembles chrome! Just start with a perfectly smooth glossy black surface and apply a few light mist coats of the Eastwood liquid chrome followed by the Eastwood liquid chrome clear.

A top coat of urethane clear can also be used for greater durability. Provides the perfect accent for custom graphics or as a substitute for chrome! Apply by airbrush with no. 5 tip or jamb/touch up gun. The kit covers approx 10-15 sq.ft. urethane clear is a two part lacquer that provides an extra durable finish over the liquid chrome finish.

- 1 Liquid chrome kit012-225£79.94
- 2 Urethane clear quart (946ml)012-086£28.94
- 3 Urethane clear activator quart (946ml)012-087£28.94

SPECIALIST PAINTS

Epoxy primer

Eastwood's epoxy primer is a user-friendly two component primer sealer free of lead, chromate and isocyanates. This system provides excellent adhesion and corrosion resistance while drying fast and maintaining good colour hold out.

Can be applied over steel, aluminium, fibreglass, body fillers and existing finishes. Unlike most epoxy primers, Eastwood's epoxy primer is easy to sand 2-3 days after application. Must use 012-230 1:1 catalyst.

- 1 Epoxy primer grey quart (946ml)012-229£24.95
- 2 Epoxy primer catalyst quart (946ml)012-230£17.95

POWDER COATING

HotCoat powder coating system

Powder coat like a Pro...

This innovative system will allow you to achieve the benefits of powder coating small parts instead of coating them with paint. All you need is a compressed air source (5-10 PSI from a portable tank with a regulator or a compressor), and an electric oven.

The HotCoat system should only be used in a clean, dry, well ventilated work area! A dedicated electric oven should be used. Complete kit includes: Application gun, power unit (requires 115V AV 60HZ, grounded outlet), activator switch, disposable moisture filter and 8oz. of high gloss black. Detailed instruction will assist you with results.

Note: A transformer is required for use in the UK (230V).

Deluxe kit includes:

- HotCoat gun ■ cables & complete instructions ■ 1 x disposable moisture separator ■ 1 x pack of 30 reusable silicone plugs ■ 1 x 108' roll high temp. masking tape, ■ 1 x 1lb (454g) spool of stainless wire ■ 1 x 8oz. (225g) can of gloss black ■ 1 x 8oz. (225g) can of bright red ■ 1 x 8oz. (225g) can of yellow ■ 3 x bottles and lids.

- HotCoat system - deluxe kit012-170£124.94

- Tough flexible coating.
- Crystal clear finish.
- Fuel and heat resistant.

Diamond clear lacquer

Diamond clear offers metal and painted parts a crystal clear, tough, flexible coating that keeps brass, aluminium, steel, die-cast, even cast iron looking great.

This self-levelling formulation, resists chips, cracks, fading and yellowing. Fuel resistant and will withstand temperatures of up to 148°C (300°F), its ideal for engine bay applications except exhaust manifolds. Great for polished wheels, aluminium valve covers as well as items around home. Ensure surface is grease and oil free with pre painting prep (012-042 see page 24).

- Bare metal surfaces gloss 12oz aerosol (340g) ..012-023£12.25
- 1 Bare metal surfaces satin 12oz aerosol (340g) ..012-024£12.25
- Painted surfaces gloss 12oz aerosol (340g)012-021£12.25
- 2 Painted surfaces satin 12oz aerosol (340g)012-022£12.25

HotCoat powders

A variety of coloured powders are available as replacement for kits or for custom detailing:

- 1 HotCoat powder - full gloss clear012-122£12.95
- HotCoat powder - gloss black012-134£12.95
- 2 HotCoat powder - semi gloss black012-135£12.95

DETAILING PAINTS

These paints are a must for detailing engine bay components and engine ancillaries. The three colours allow you to get the look of your engine bay just right. The special formulation protects up to 120°C (250°F) and the acrylic lacquer has a low, natural 4-15% gloss to give the perfect finish for your restoration. Available in aerosols and quarts; one aerosol covers 6 sq.ft., one quart covers 50 sq.ft.

ANTIFREEZE & COOLANT FLUIDS

Protect your investment and provide lifetime cooling!

See website for full details

NEW Evans waterless engine coolant

Evans waterless engine coolant is a unique & revolutionary engine coolant fluid formulated to improve efficiency and reduce corrosion of your car's cooling system, protecting your cherished classic. It neither contains water nor requires mixing with water, overcoming the limitations associates with using water in engine cooling systems, such as boiling and corrosion.

- No water - no overheating.
- No water - no scaling.
- No water - no pressure.
- No water - more BHP.
- No water - no liner pitting.

We offer the full range to suit vintage, classic and modern car cooling systems.

Vintage Cool 180 should be used on older (pre 1945) engines that have copper, brass & bronze and more porous cast iron components - best suited to T Types etc.

Classic Cool 180 is suitable for all of our later (post 1945) classic cars, such as MGA, MGB's, Spridget's, TR's, Spitfire's & GT6's, Minis, etc.

Power Cool 180 is suitable for all engines with major aluminium components, such as alloy heads or full alloy engines, it is suitable for Rover V8, K Series and Mazda MX-5.

Auto Cool 180 is suitable for modern production cars with engines fabricated from a mixture of cast iron, copper, steel and aluminium components.

	2 litre	5 litre

Antifreeze

Recommended for use all year round as it works as a corrosive inhibitor against the water in your cooling system.

1 Antifreeze 1lt	.GEC2001£3.95
2 Antifreeze 2lt	.GEC2002£7.25
3 Antifreeze 5lt	.GEC2005£16.96

Bars radiator leak

For small leaks only.

1 Bars leaks	.MRD1031£3.95
2 Bars leaks - pellet	.GAC6073£2.65
3 Bars flush	.MRD1032£3.50

Radiator flush

Wynn's Radiator flush converts old coolant into a cleaning solution that loosens sludge and deposits that can contaminate new coolant. These deposits and sludge are safely removed during coolant draining.

1 Radiator flush 325ml	.GGL1000£4.66
------------------------	----------	------------

Radiator stop leak

Wynn's Radiator stop leak will seal small leaks without damage to hoses, gaskets and other systems components.

1 Radiator stop leak 325ml	.GGL1001£5.10
----------------------------	----------	------------

Water Wetter

Aids heat transfer, reducing coolant temperature by up to 10°.

1 Water Wetter (cooling aid)	.MM220-115	...£13.75
------------------------------	------------	-----------

ENGINE OIL ADDITIVES

Engine flush

Wynn's Engine flush quickly and efficiently dissolves varnish and removes sludge and other contaminants from vital engine parts, leaving engines clean internally.

1 Engine flush for petrol 425ml	.GGL1002£5.10
---------------------------------	----------	------------

Engine stop leak

Wynn's Engine stop leak is a special blend of chemicals formulated to stop oil leaks and drips that can result from the drying out and shrinking of engine seals and O rings. Engine stop leak has no material effect on the viscosity or performance of engine oil.

1 Engine stop leak 325ml	.GGL1003£6.70
--------------------------	----------	------------

Hydraulic valve treatment

Wynn's Hydraulic valve lifter treatment is 100% oil soluble & contains no solid particles. Developed to clean away internal engine deposits that create noise and reduce efficiency, it is compatible with mineral and synthetic engine oils.

1 Hydraulic valve lifter 325ml	.GGL1004£8.65
--------------------------------	----------	------------

Stop smoke

Wynn's Stop smoke's synthetic formulation will react to heat and heavy loads to help fill the gap between worn engine components to reduce oil burning and noise. Its viscosity-index improvers will help restore high mileage and worn engines.

1 Stop smoke 325ml	.GGL1005£5.40
--------------------	----------	------------

CORROSION PROTECTION

PROtech corrosion protection

PROtech-1 is a transparent surface coating providing excellent corrosion protection. It gives a dry transparent finish and is ideal for use on polished and chrome components, electrical fittings and engine bay applications. Because the chrome retains its shine, it is perfect for use on bumpers, overrides, alloy rocker covers etc to give everyday corrosion protection.

PROtech-2 is suitable as supplementary corrosion protection for extended storage periods and to protect items used in inclement environs. This is a penetrating wax based surface coating and anti-rust agent, which offers a dry, flexible film finish. Use PROtech-2 for all your electrical connectors and relays in use and on bumpers, grilles, brightwork etc to help stop corrosion whilst storing your classic (easily removed with PROclean-Gold).

1 PROtech No1	.MQC721101	...£16.96
2 PROtech No2	.MQC721102	...£16.96
3 PROclean Gold	.MQC721103	...£11.95

FUEL ADDITIVES & TREATMENTS

VSPe Power Plus

MILLERS OILS Lead replacement and octane booster with added benefit of ethanol protection. Adds up to 2 octane numbers (20 points) to pump fuel, it prevents valve seat recession and combats the adverse effects of ethanol in fuel.

Also contains additives to prevent fuel system corrosion and anti-oxidants to improve fuel life. Recommended for all classic engines previously requiring leaded fuel, now running on unleaded fuel.

- VSPe Power Plus 250mlGGL4030X£7.96

VSPe

MILLERS OILS Lead replacement with ethanol protection. Prevents valve seat recession and combats the adverse effects of ethanol in fuel. Also contains additives to prevent fuel system corrosion and anti-oxidants to improve fuel life. Recommended for all classic engines previously requiring leaded fuel, now running on unleaded fuel, where an octane improver is not required.

- VSPe 250mlGGL4031X£7.50

EPS

MILLERS OILS Ethanol protection only. Combats the adverse effects of ethanol in fuel, also contains additives to prevent fuel system corrosion.

Recommended for classic engines that have been rebuilt (or fitted with a cylinder head that has been rebuilt) using hardened valve seats, previously requiring leaded fuel, now running on unleaded fuel where lead replacement and an octane improver are not required.

- EPS 250mlGGL4032X£6.50

CVL (competition valve lubricant)

MILLERS OILS Complies with FIA fuel regulations for historic racing and enables older race engines to run safely on unleaded fuel. Adds 3 octane to base fuel.

- CVL octane boost 250mlGGL4011X£11.75

CVL turbo

MILLERS OILS An out and out octane booster, adding 4 octane to base fuel, ideal for track days. Will give 103 octane when added to Shell V power.

- CVL turbo 500mlGGL4010X£15.95

Injector cleaner

Wynn's A fast and effective fuel system cleaner designed to clean and maintain petrol fuel systems in optimum condition. Keeping the injectors clean will improve the spray pattern increasing performance and economy.

- Injector cleaner 325mlGGL1006£5.56

Redex petrol treatment

Redex is the traditional choice fuel additive to help clean and maintain your car's fuel system and carburetors.

- Redex petrol treatment 250ml . . .REDEX-RP2 . . .£5.35

BRAKE FLUIDS

Brake fluids

DOT4 brake fluid

DOT4 brake fluid, has a higher boiling point than DOT3. We would consider this the minimum specification required.

JB Weld

JB Weld is a tough adhesive that can be used for permanent repairs. It has a tensile strength of 4000psi and can withstand temperatures of 300°C. It does not shrink or crack and can be drilled, tapped, machined, polished or painted.

- JB Weld (2 part kit)MQC1135£7.94

GASKETS & SEALANTS

Hylosil instant gasket

Engineering grade sealant used to replace traditional gaskets. It has an operating temperature from -50°C to 250°C.

■ Hylosil instant gasket 40ml tube .GGL1028£1.94

Hylotite red

Good gap filling abilities make it useable for pitted surfaces. Prevents galvanic reaction between dissimilar metals.

■ Hylotite red 50g tubeGGL1029£4.96

Hylomar AF

This solvent free, non-setting compound is designed for sealing gaskets where reuse may be required, such as sump gaskets. The non-setting formula allows reuse of the gasket.

■ Hylomar AFGGL1031£5.35

Hylomar blue

Traditional gasket sealant.

■ Hylomar blue 100g tubeGGC102£5.24

Hylomar M

High performance gasket compound designed for use in racing applications. Can be used to seal finely machined surfaces where a gasket is not used. Resistant to fuel, oil etc...

■ Hylomar MGGL1032£5.65

Hermetite - exhaust assembly paste

Hermetite exhaust assembly paste, acts as a lube to help assemble exhaust components, then sets to ensure a good seal.

■ Hermetite exhaust sealant 150g .GAC2054£2.05

Wellseal

Gasket jointing compound as used by Rolls Royce.

■ Wellseal 100ml tube600569A£8.95

Silicone gasket maker

This silicone sealant is ideal for use as an alternative to traditional gaskets and useful for general sealing around the car.

■ Silicone gasket maker 200ml ...GGL1009£11.56

LEVER ARM DAMPER OIL

Penrite shock absorber oil

Designed for use in lever arm and vane type shock absorbers. Shock oil 1 is a light SAE20, suitable for normal use in Armstrong lever arm dampers.

Shock oil 2 is a heavy SAE20 that increases the damping rate and is more suited to fast road and competition use.

1 Shock oil 1 500mlGGL9038X£6.95

■ Shock oil 2 500mlGGL9039X£6.95

Moss shock absorber oil

This shock absorber oil is custom blended for use in all Girling and Armstrong lever arm shock absorbers. With a convenient flip-open pouring spout.

■ Shock absorber oil 16fl ozAAA149M£12.50

BODY SEALANTS

Windscreen sealant

This specially formulated sealant is the correct product for sealing windcreens. The special formula remains elastic, does not crack and is resistant to cleaning products, it will not effect paint, rubber or chrome and stainless finishers.

■ Windscreen sealant 380ml cartridge MQC1136£5.95

LUBRICANTS

Graphogen engine assembly lube

Use this when building your engine to protect vital components from wear during initial fire up before the oil gets properly circulated. Use for bearings, rockers, camshafts, followers, etc...

■ Graphogen assembly lube 125g .GGL9122X ...£24.95

Cam lubricant

Lubricate and protect the cam and followers during initial fire up after building your engine.

■ Cam lube 250mlKEN2£6.65

Soldering kit

This soldering kit is ideal for the home workshop and contains all you need to tackle a wide variety of soldering jobs. Both soldering irons are 230 volt with plugs fitted. Solder, flux and gun tips included.

- 100W soldering gun featuring instant heat twin probe, trigger control, spot tip illumination.
- 30W soldering iron with "stay cool" moulded handle, safety stand.
- Hands free stand/magnifier with multi positional jaws and cast iron base.
- De-soldering suction tool.
- Multi- purpose scraper.
- All contained in a tough moulded carry case.

- Soldering kitMTR473102£22.96

Digital analyser

A compact multi-function digital analyser especially for the car enthusiast who wants to quickly identify faults, check for problems and be sure that his motor is in peak running condition. Suitable for most 3 - 8 cylinder petrol engines.

- Measures DC potential (0-1000 volts) & DC current (0-10 amps).
- Measures resistance (0-20,000 Ohms).
- Measures dwell angle.
- Measures rotation speed (0-10,000 RPM).
- Features 10,000 Ohm input impedance for measuring sensitive on board computer controlled components.
- Includes auto polarity indicator, diode test & audible continuity test
- Supplied with integral stand, test probes & battery.
- Carry case.

- Digital analyserMTR471101£23.95

Heat shrink

Pack contains 18 assorted diameter heat shrink pieces.

- Heat shrink packMQC1004£1.94

Electrical tape

We stock a range of insulation and wiring harness binding tapes.

- 1 Insulation tape rollDMR11910£1.24
- 2 Loom tape (non-adhesive) - blueMQC1000£4.15
- Loom tape (non-adhesive) - blackMQC1001£2.05

SWITCH BEZEL TOOL

Switch bezel tool

The round bezels on most Lucas switches have two slots, and nobody has the special tool - a bezel nut spanner - you need to take them off. This tool fits switches with straight toggles.

- Switch bezel tool384-960£17.95

FILES

File set

These tough steel files comes in a range of shapes for general engineering & metalwork, with both long & short pieces each fitted with a comfortable moulded handle. Includes 5 8" files and 6 4" files.

- File set (11 piece)
MTR162901£13.15

Needle file set

For working on those fine details.

- Needle file set
DMR14184£7.25

Thread restoring files

Allow external threads to be redressed when burred.

- Thread restoring file - UNF
MTR1501£29.95
- Thread restoring file - Whitworth/BSF
386-600£29.95
- Thread restoring file - Metric
386-610£29.95

HAMMERS & PUNCHES

Soft faced hammers

Using a soft faced hammer allows the extra force sometimes required without damaging the component.

- Rubber mallet
MTR181401£3.65

- Copper & hide mallet - 998g (2.2lb)
C27290£22.94

- Copper & copper mallet - 907g (2lb)
11B5166£22.94

- Copper & copper mallet - 453g (1lb)
386-000£19.30

- Nylon & plastic face hammer - 680g
DMR72027£30.98

Ball pein hammers

These general purpose hammers feature high quality, fine grain forged carbon steel heads with genuine hickory shafts.

- Ball pein hammer - 340g (12oz)
MTR181102£4.75
- Ball pein hammer - 453g (1lb)
MTR181103£5.95
- Ball pein hammer - 680g (1.5lb)
MTR181104£7.15

Punch & chisel set

A useful selection of well sized punches and chisels, manufactured from drop forged hardened steel with a fine sandblast finish.

- 6 cold chisels from 1/2" to 1" and up to 10" long.
- 2 centre punches 5/32" & 7/32" up to 8" long.
- 3 taper punches 1/8" to 3/8" and up to 10" long.
- 1 pin punch 3/8" x 8" long.
- Storage roll/pouch.

- Punch & chisel set
MTR182901£21.55

Splitting chisel

High quality steel chisel with shallow taper ideas for separating panels and splitting spot welds.

- Splitting chisel (25mm x 240mm)
DMR13278£16.32

BENCH VICE

Bench vice

High quality cast iron engineers bench vice, featuring a large square anvil area.

- Jaw width = 150mm.
- Jaw opening = 180mm.
- Jaw depth = 80mm.

- Bench vice
MTR3100£47.95

HEX KEYS

Hex keys

Robust 7 piece AF or metric long arm, ball end hex key sets manufactured from chrome vanadium steel and supplied with a plastic holding clip

- Hex key set - AF
(1/8", 5/32", 3/16", 7/32", 1/4", 5/16", 3/8")
MTR153201£5.95
- Hex key set - metric
(2.5, 3, 4, 5, 6, 8, 10mm)
MTR153301£5.95

HACKSAW

Hacksaw

Traditional chrome plated tubular frame with adjustable blade tension. Featuring two sets of blade spigots to allow for straight or 45 degree cutting.

- Hacksaw frame 300mm
DMR31131£26.33
- Hacksaw blades 24tpi 300mm (10 pack)
DMR19348£22.66

Nut splitter set

Corroded, damaged or seized nuts can be easily removed using a nut splitter. A few turns with a spanner and the hardened steel chisel soon slices through the nut to release the thread. Two piece kit; small splitter 12-16mm nuts; large splitter 16-22mm nuts.

- Nut splitter set
MTR173101£10.75

EVANS WATERLESS COOLANT

Protect your investment and provide lifetime cooling!

Evans waterless engine coolant is a unique and revolutionary engine coolant fluid formulated to improve efficiency and reduce corrosion of your car's cooling system, protecting your cherished classic.

It neither contains water nor requires mixing with water, overcoming the limitations associated with using water in engine cooling systems, such as boiling and corrosion. Evans offer a full range of coolant to suit vintage, classic and modern car cooling systems, see page 28 or visit moss-europe.co.uk

EUROPE'S CLASSIC MOTOR OIL

Dynolite offers a broad range of oils and lubricants for Veteran, Vintage and Classic cars & motorbikes. Dynolite lubricants are blended to exceed the original vehicle manufacturer's specifications. They are formulated from high quality components and are only combined with additives specially selected for their compatibility with metals and components used in older vehicles, including suitable levels of ZDDP to combat wear, often reduced in modern oil blends. Most modern oils do not cater for these older technologies.

Dynolite's philosophy stands out for its range, offering specific lubricants for engines, gearboxes, steering boxes, as well as greases. In terms of mechanical protection, Dynolite lubricants are far superior to those usually found on the market for the simple reason that they have been specially developed for your historic vehicle. Therefore, you benefit from increased protection, higher oil pressure combined with a lower degree of acid attack and corrosion, reducing gum and sludge formation.

EUROPE'S CLASSIC MOTOR OIL

See page 2 for details of the full range of Dynolite oils and lubricants.

PLIERS & GRIPS

Circlip plier set

These pliers are the only way to correctly remove circlips. Overall length 155mm.

- Straight jaw - 1.2mm tip.
- Straight jaw - 1.5mm tip.
- 45 degree jaws - 1.5mm tip.
- 90 degree jaws - 1.5mm tip.

■ Circlip pliers setMTR141501£8.35

Plier set

3 piece set containing: Standard pliers, side cutters and long nose pliers.

■ Plier set (3 piece)DMR45864£21.89

Professional pliers set

A selection of five professional quality pliers with insulated handle grips for comfort all contained in a convenient storage case.

- Combination pliers 179mm/7"
- Long nose pliers 152mm/6"
- Diagonal side cutter 152mm/6"
- Stripping pliers 152mm/6"
- Water pump pliers 254mm/10"

■ Professional pliers setMTR149102£18.95

Pliers & wrench set

A selection of quality tools with comfortable handle grips, ideal for the mobile tool kit.

- Long nosed pliers 200mm/8".

- Curved jaw locking pliers 250mm/10".
- Adjustable wrench 250mm/10".
- Water pump pliers 250mm/10".
- Diagonal side cutters 180mm/7".

■ Pliers & wrench setMTR149101£34.45

Adjustable ratcheting spanner

This crescent-type adjustable ratcheting spanner is manufactured from chrome vanadium steel with matt chrome plated finish and a soft grip rubber handle for user comfort. The ratcheting action gives superior torque than a conventional adjustable spanner. Great for the mobile tool box!

■ Adjustable ratcheting spanner 200mmDMR48962£26.83

Adjustable wrench

This 8" adjustable wrench is an essential item for any tool kit. Manufactured from high grade chrome vanadium steel, smooth jaw opening (to 30mm) with metric & AF graduated scale. Length 205mm.

■ Adjustable wrench - 200mm/8"MTR125101£9.65

Self locking pliers sets

Self locking pliers provide an exceptionally strong hold where conventional tools may not be suitable. Precise adjustment, locking action and serrated jaws give powerful grip for worn or stubborn fittings which otherwise are difficult to shift.

1 Self locking pliers set - curved jawMTR141401£9.65
(Contains: 3 curved jaw pliers: 125mm/5", 175mm/7", 250mm/10")

2 Self locking pliers set - curved & straightMTR141402£9.65
(Contains: 2 curved jaw pliers: 125mm/5", 250mm/10", 1 long nose 150mm/6")

Hand riveter kit

The hand riveter has powerful lever action arms, spring loaded handle with PVC moulded grips and interchangeable nozzles. The kit includes 60 assorted rivets (2.4, 3.3, 3.9 and 4.9mm) with nozzles to suit, nozzle spanner all housed in a handy carry case.

■ Hand riveter kitMTR192101£10.75

PULLERS

Twin/triple legged puller sets

High quality forged steel pullers can be used for either internal or external, twin or triple leg pulling of bearings, pulleys flanges etc. available in 100mm/4" or 150mm/6" sizes.

1 Puller set - 100mm/4"MTR491101£11.95
(Max spread: 100mm, max reach: 65mm)

■ Puller set - 150mm/6"MTR491102£16.75
(Max spread: 150mm, max reach: 112mm)

Hydraulic puller set

A versatile pulling set for the professional mechanic and regular home mechanic. Featuring a forged steel yoke and claws with the added convenience of hydraulic power, this set is highly effective for the removal of stubborn hubs, flanges, gears or bearing. Use with 2 or 3 jaw configurations for pulling and a choice of centring of flat adaptors for thrust operation.

- Hydraulic puller setMTR491103 . . .£101.99
(Max spread: 200mm, max reach: 160mm)

Flywheel puller set

For removing flywheels, harmonic balancers or pulleys from their respective shafts, this puller set is highly effective and minimises the risk of damage to the component or shaft. It is adaptable to many different configurations with a wide selection of pieces. Includes yoke for 2 or 3 point fixing, centering adaptors and assorted metric & imperial fixing hardware. Removes flywheels and pulleys 36 to 95mm diameter.

- Flywheel puller setMTR491201 . . .£23.95

Bearing separator/puller

This kit contains two essential sizes of separator pullers to cover a particularly wide range of bearings commonly used in automotive, agricultural and marine applications. It includes 2 separators, a variety of extension bars thrust bolt and fittings, supplied in a strong steel case.

- Max bearing OD 160mm (with extension) 52mm, 200mm (with extension) 70mm
- Removable extension bars (105/130mm)
- Thrust bolt 180mm
- Yoke 160mm

- Bearing separator/pullerMTR491301 . . .£71.95

SPANNERS & SETS

BA spanner sets

Quality chrome vanadium steel combination and open ended BA spanner sets.

- BA combination spanners set (4 piece)DMR04197 . . .£39.55
- BA open ended spanners set (5 piece)DMR05210 . . .£45.55

Spanner sets

Manufactured from durable chrome vanadium steel, these combination spanner sets include the most common sizes and feature 15° offset heads & polished ends. Supplied in storage wallet.

- Spanner set - combination AFMTR131204 . . .£17.95
(11 AF sizes: 3/8", 7/16", 1/2", 9/16", 5/8", 11/16", 3/4", 13/16", 7/8", 15/16" & 1")
- Spanner set - combination metricMTR131304 . . .£10.75

SOCKETRY

Clarke Pro cased socket sets

A range of professional quality socket sets manufactured from forged chrome vanadium steel, hardened, tempered, mirror polished and chrome plated for corrosion protection. Each set is supplied in a tough moulded storage & carry case. Lifetime Guarantee (excludes ratchet mechanism).

Clarke Pro

- Socket set (55 piece) 1/4" drive AF & MM MTR114201£46.96

Set contains:

- 9 x 3/8" drive AF sockets (3/8 - 7/8").
- 10 x 3/8" drive AF deep sockets (5/16 - 7/8").
- 14 x 3/8" drive metric sockets (6 - 19mm).
- 14 x 3/8" drive metric deep sockets (6 - 19mm).
- 2 x 3/8" drive extension bar (75mm, 150mm).
- 5 x 3/8" drive TORX socket bits (T40 - T60).
- 1 x 3/8" drive ratchet handle.

Clarke Pro

- Socket set (24 piece) 1/2" drive MM MTR114203£47.95

Set contains:

- 18 x 1/2" drive sockets (10 - 32mm).
- 1 x 1/2" drive ratchet handle with quick release mechanism.
- 1 x 1/2" drive sliding T-bar.
- 1 x 1/2" drive speed brace.
- 1 x 1/2" drive universal joint.
- 2 x extension bars (125mm & 250mm).

Clarke Pro

- Socket set (62 piece) 1/4" & 1/2" drive MM MTR114204£79.96

Set contains:

- 18 x 1/2" drive sockets (8-32mm).
- 12 x 1/4" drive sockets (4-14mm).
- 5 x Torx (T15, T20, T25, T30, T40).
- 3 x Phillips (PH1, PH2, PH3).
- 4 x Pozi drive (No.2, No.4, No.5.5, No.7).
- 4 x Hex (3, 4, 5, 6).
- 2 x ratchet handles (1/4" & 1/2" drive).
- 2 x sliding T bars (1/2" drive & 1/4" drive).
- 2 x universal joints (1/2" drive & 1/4" Drive).
- 2 x 1/2" drive extension bars (125 & 250mm).
- 3 x 1/4" drive extension bars (50, 100 & 300mm).
- 1 x 1/2" drive breaker bar (380mm).
- 1 x 1/4" drive Go through handle.
- 1 x 1/4" drive coupling adaptor.

Clarke Pro

- Socket set (78 piece) 1/4" & 3/8" drive AF & MM MTR114202£47.95

Set contains:

- 9 x 3/8" drive metric sockets (9 - 19mm).
- 9 x 3/8" drive AF sockets (1/4" - 3/4").
- 11 x 1/4" drive metric sockets (4 - 13mm).
- 10 x 1/4" drive AF sockets (3/16 - 1/2").
- 5 x 3/8" drive metric deep sockets (10 - 16mm).
- 6 x 1/4" drive metric deep sockets (5 - 10mm).
- 2 x 3/8" drive spark plug sockets (13/16", 16mm).
- 1 x 3/8" drive universal joint.
- 2 x 3/8" drive extension bar (100mm).
- 1 x 1/4" drive extension bar (100mm).
- 1 x adapter - 1/4" (male) x 3/8" (female).
- 2 x ratchet handles (1/4" drive & 3/8" drive).
- 17 x hex keys (1.5mm - 6mm & 1/16" - 1/4").

Single sockets

Chrome vanadium steel AF and Whitworth sockets.

- Socket 1.1/16 AF 1/2 square drive DMR76924£5.95
- Socket 1.1/8 AF 1/2 square drive DMR76916£5.75
- Socket 1.5/16 AF 1/2 square drive DMR19989£7.10
- Socket 1/8 Whitworth 1/2 square drive 381-800£6.77
- Socket 3/16 Whitworth 1/2 square drive 381-900£6.77
- Socket 1/4 Whitworth 1/2 square drive 382-000£6.77
- Socket 5/16 Whitworth 1/2 square drive 382-100£6.77
- Socket 3/8 Whitworth 1/2 square drive 382-200£6.77

Palm ratchets

These compact ratchets fit neatly in the palm of your hand and feature a fine tooth ratchet for precise work. Ideal for working in tight areas where you can not always use a lever ratchet. Supplied as a pair with 1/4" & 3/8" drive.

- Palm ratchets (pair) DMR34962£8.65

Angular torque

Angular torque settings are more frequently used by modern vehicle manufacturers than traditional load based settings. The MGF uses angle setting for the cylinder head. This gauge allows accurate tightening to manufacturer's specification. Requires a 1/2" drive breaker bar.

- Angular torque gauge MTR1130£9.95

Socket convertor set

A set of three chrome vanadium steel socket converters. Set contains one of each: 3/8" (F) to 1/4" (M), 1/2" (F) to 3/8" (M), 3/8" (F) to 1/2" (M).

- Socket convertor set (3 piece) DMR34962£8.65

Breaker bars

Hardened and tempered chrome vanadium steel breaker bars for when extra leverage is required. Long, slim style polished chrome handle with spring loaded socket retention.

- Breaker bar - 3/8" drive 450mm longMTR112901£10.25
- Breaker bar - 1/2" drive 600mm longMTR113901£16.45

Torque wrenches

Correct torque settings are essential for the safety and integrity of many fasteners & components throughout your classic. These torque wrenches are manufactured to high standards of accuracy and feature micrometer sleeve type adjustment.

- 1 Torque wrench - 1/2" driveMTR117301£28.96
 - 28-210Nm (20-154ft/lb) range. ■ length 470mm.
 - 5" extension bar & 1/2"-3/8" drive convertor. ■ Moulded plastic storage case.
- Torque wrench - 3/8" driveMTR117201£20.35
 - 1.4-11.1kg/m (120-960in/lb) range. ■ Length 275mm.
 - Reversible ratchet head. ■ Moulded plastic storage case.
 - 5" extension bar & 1/2"-3/8" drive convertor.

Extension bar set

A set of nine high quality chrome vanadium steel 'wobble' extension bars with a knurled section for improved grip. Sockets can be driven with shaft offset by up to 10°.

- Extension bar setMTR116401£19.15
- Set contains:
- 1/4" drive @ 50, 100 & 225mm long.
 - 3/8" drive @ 75, 150 & 250mm long.
 - 1/2" drive @ 520, 125 & 250mm long.

TOOL TIDIES

Magnetic tool rail

Wall or toolbox mounting magnetic rack suitable for retaining frequently used steel tools such as screwdrivers, spanners and pliers. 500mm long & supplied with fixing screws. Tools not included.

- Magnetic tool railMTR332901£8.95

Tools not included.

Socket rail set

- 1 Socket rail set (3 piece) 1/4, 3/8 & 1/2 drive
 - 16 clips eachMTR119102£8.35
- Socket rail - 1/4 drive 18 clipsDMR76920£5.15
- Socket rail - 3/8 drive 16 clipsDMR76921£5.15
- Socket rail - 1/2 drive 14 clipsDMR76922£4.96

Socket tray

Steel tray comprising of five 430mm rails and clips suitable for retaining 1/4", 3/8" and 1/2" Sq drive sockets. Also includes two 10 piece bit holders. Also features carry handles and hanging holes for workshop storage.

- Socket trayMTR119101£19.96

MEASURING

Dial test indicator & stand

Using a dial test indicator is a must if you are building an engine or accurately checking for run out on a brake disc. This gauge features metric graduations of 0.01mm with 10mm of travel and an adjustable bezel for zero setting. The magnetic stand offers secure and accurate positioning of the DTI.

- 1 Dial test indicatorMTR1062£17.95
- 2 Magnetic standMTR1063£23.95

Combination square set

This versatile set comprises a square, centre & protractor heads with a 300mm steel rule. Each head can be locked onto the rule for precise measuring and marking. Protractor head features 180° range with 1° increments. The scriber features hardened & ground steel points with straight & 90° ends.

- 1 Combination square setMTR1061£32.45
- 2 Engineers scriberMTR1060£2.95

Digital vernier caliper

Digital display vernier caliper with imperial & metric measurements and a micro-adjustment thumb wheel. Suitable for internal, external and depth measurement. Supplied in plastic storage case.

- Digital vernier caliperMTR1064£19.75

Feeler gauge

Essential tool for setting spark plugs, tappet clearances etc...

- 1 Metric/imperial feeler gauge setDMR19613£19.96
- Imperial feeler gauge setDMR73970£3.72

SCRAPERS & LEVERS

Heavy duty pry bar set

A set of 4 pry bars for heavy duty levering. Set contains: 1 x 8", 1 x 12", 1 x 18" & 1 x 24" bars with 'chisel' tips and plastic handles.

■ Heavy duty pry bar setMTR1004£15.95

No-mar pry bar set

Using the right tool for the job is a must if you don't want broken parts or scratched paint. This set of 5 pieces is perfect for removing fasteners, trim or moulding and don't want to damage your paint or those expensive fasteners.

■ No-mar pry bar set (5 piece)MTR1010£16.85

Hook & pick set

For simple removal of O rings, cotter pins, clevis pins, seals, etc...

■ Hook & pick set (4 piece)MTR1001£3.55

Scraper set

Remove old gaskets, sealants and carbon deposits from the cylinder head. Manufactured from high carbon steel with tempered and shot blasted tips.

■ Scraper set (3 piece)MTR1003£11.95

Oil seal puller

Designed to remove oil and grease seals from engine and transmission housings. Heat treated double sided tip suits most applications.

■ Oil seal pullerMTR1002£5.65

SCREWDRIVER SETS

Screwdriver set

This screwdrivers set features a high quality S2 grade steel shank, with soft grip handles and hex drive end for improved leverage.

Set contains:

- 5 Flat: 3x75mm, 5x150mm, 6x150mm, 6x38mm, 8x150mm.
- 5 Phillips: No.0x75mm, No.1x100mm, No.2x100mm, No.2x38mm, No.3x150mm.

■ Screwdriver set (10 piece)MTR151201 ... £19.96

Professional screwdriver set

This professional quality screwdriver & bit set covers 5 popular formats. With high torque soft grip screwdrivers & handle have chrome vanadium steel shafts with hardened, shot blasted and magnetized tips. Supplied in a tough moulded case.

Set contains:

- 4 large flat: (mm) 6x100, 8x150, 6x38 & 5x75 (insulated).
- 4 large Phillips: No.2x100, No.3x150, No.2x38 & No.1x75 mm (insulated).
- 7 precision screwdrivers: 2xPhillips, 3xSlotted, 2xTX-Star.
- 25 assorted bits: 4xPhillips, 5xSlotted, 4xPosidrive, 6xTX-Star, 6xHex.
- Flexible drive shaft (190mm) and a magnetised bit driver.

■ Screwdriver set (10 piece)MTR151202 ... £23.95

Screwdriver set

A selection of popular flat & cross head screwdrivers with satin black handles designed for DIY and general purpose use, good value for money.

Set contains:

- 5 flat: (mm) 6x38, 5x75, 6x100, 8x150, 9.5x200.
- 3 Phillips No.2 x sizes 38, 75 & 100mm.

■ Screwdriver set (8 piece)MTR151203 ... £7.15

TAP & DIE SETS

Manufactured from high quality tungsten steel for easy, accurate thread cutting. Ideal for rejuvenating & cleaning old or clogged up threads. Supplied in a steel case.

Clearance

■ UNF tap & die set (24 piece)MTR019201£23.95

Set contains:

- UNF taps & dies: 1/4"-28, 5/16"-24, 3/8"-24, 7/16"-20, 1/2"-20.
- Tap wrench.
- Die handle.
- T handle.
- SAE screw pitch gauge.

■ Metric tap & die set (28 piece)MTR019301£28.75

Set contains:

- Metric taps & dies: 3x0.5, 3.5x0.6, 4x0.7, 5x0.8, 6x1, 8x1.25, 10x1.5, 12x1.75.
- Tap wrench.
- Die handle.
- T handle.
- Metric screw pitch gauge.

STUD & SCREW EXTRACTORS

Remove broken, damaged or stubborn studs & screws easily with these extractors.

Screw extractor & wrench set

Clearance

■ Screw extractor & wrench set (7 piece)MTR173202£11.95
(Contains a selection of LH threaded extractors, 3-19mm)

Stud extractor set

Clearance

■ Stud extractor set - socket type (4 piece)CTR021£19.94
(Contains 4 socket extractors, 6, 8, 10, 12mm)

Nut splitter set

Clearance

Corroded, damaged or seized nuts can be easily removed using a nut splitter. A few turns with a spanner and the hardened steel chisel soon slices through the nut to release the thread. Two piece kit; small splitter 12-16mm nuts; large splitter 16-22mm nuts.

■ Nut splitter setMTR173101£10.75

GARAGE EQUIPMENT

CAR CREEPER & SEAT

Mechanics kneeling pad

SEALEY

This hard wearing but soft EVA kneeling mat ideal for the home workshop, making those jobs around the car & home a little more comfortable. Size = 450mm x 215mm x 28mm.

■ Mechanics kneeling mat
MTR373101£4.94

Mechanics seat

SEALEY

This mechanics seat features a padded cushion supported by an adjustable height (range 380mm to 500mm) lever operated gas strut. The base doubles as a storage tray and is fitted with five 60mm ball bearing castors for easy mobility.

■ Mechanics seat
MTR372101£54.95

Mechanics car creeper

Clearance

Make working underneath the car a pleasure with this car creeper. Padded in vinyl for comfort it features a headrest to support your head.

■ Car creeper
CTR095£32.95

ENGINE CRANE

Engine crane

This engine crane has an excellent lifting range making it ideal for the home workshop. It features a 4 stage extending jib giving a wide lifting range and capacity up to 1 tonne. The wide leg pattern gives excellent stability and heavy duty castors allow easy manoeuvrability even when loaded.

Features include:

- 250kg to 1000kgs in 4 stages.
- Max lifting height = 2060mm.
- Max jib length = 1170mm.
- High quality hydraulic ram.

■ Engine craneMTR3110£189.95

Use with MTR3110...

Load leveller

Allows an engine or other loads to be levelled for balance when being removed or installed. The screw mechanism allows for adjustment during operation.

■ Load levellerMTR3111£29.95

Engine & gearbox support beam

With broad soft rubber shoes taking the weight into the bodywork channel around the engine compartment, this versatile telescopic frame can accurately position and support major engine components during the process

of removal and refitting. Strong steel construction with durable powder coating finish.

- Maximum capacity: 500kg.
- Foot width: 1020 - 1600mm.
- Hook screw travel 350mm.

■ Engine & gearbox support beamMTR317202£85.96

- Can tilt up to 90°.
- Holds up to 900kg.

Oberg tilt-lift

Tilting an engine to clear obstructions/bulkhead, when removing the engine can be difficult. This device allows the engine to tilt and clear obstacles. Heavy-duty construction holds up to 900kg (2000lbs) and can tilt up to 90°.

■ Oberg engine tilt-liftGAC9130X£61.96

WELDING

MIG welder

The 135TE MIG welder is easy to use and ideal for the home workshop. With simple operation and controls it is ideal for the DIY enthusiast and perfect for vehicle body restoration. This welder features a non-live torch and cooling fan to improve reliability and duty cycle. Kit includes: CO2 gas bottle, regulator, mild steel wire. Features include:

- Face shield.
- Torch & earth clamp.
- 30 to 130 Amp range.
- Turbo fan for cooling.
- 0.6mm to 0.8mm wire.
- Thermal overload protection.
- Operates on 240V/13A supply.

■ MIG welderMTR3200£297.95

Arc activated face mask

Using an Arc activated face mask allows you to keep your hands free throughout the welding process. The mask provides a clear view when not welding, it then changes to shade once the arc is struck, giving eye protection to EN379.

■ Arc activated face maskMTR3210£55.96

Lumiweld

Lumiweld kit can be used anywhere to make a strong fused joint (similar to brazing), using only a butane blow lamp as a heat source. It will work on almost any type or grade of aluminium including Dural, Birmabrite (Land Rover bodywork), zinc alloys, Mazak, pot metal and die cast, resulting in a joint stronger than the parent metal.

Tried and tested, Lumiweld has hundreds of applications for the restorer; broken carb flanges, thermostat housings, rocker covers, cracked aluminium engine blocks and cylinder heads, etc.

■ LumiweldFROSTW150£17.95

AIR COMPRESSOR & TOOLS

Air hoses

- 1** Recoil air hoseMTR304101£4.75
(6mm/1/4" bore, 7.6m/25ft, 1/4" BSP fittings)
- 2** Rubber air hoseMTR304102£10.75
(8mm/5/16" bore, 10m/32ft, 1/4" BSP fittings)

Air line fittings

These snap fittings are the best way to make using your air tool easier to connect. All feature 1/4" BSP threaded fittings.

- 1** Snap plug 1/4" BSP female threadMTR3022£0.95
- 2** Snap socket 1/4" BSP female threadMTR3023£2.95
- 3** Snap plug 1/4" BSP male threadMTR3024£0.95
- 4** Snap socket 1/4" BSP male threadMTR3025£2.95

Features include:

- 1.5 hp motor.
- 50lt receiver, 8 bar (116psi) max working pressure.
- 6.3 cfm displacement.
- fully automatic start and stop, safety valve and gauge.
- wheels for easy mobility.

Air compressor

This mid size compressor is designed for the DIY/semi-professional user. Ideal for spraying and automotive air tools, and compact to fit in the garage.

- 1** Ranger 54 compressorMTR3000£184.96

Professional spray gun

This spray gun features a 1 litre cup and adjustable spray fan controls, making it ideal for home workshop or semi-professional user. Suitable for use with most liquids including: cellulose, enamel, polyurethane, acrylic and other similar viscosities. Supplied with a 1.2mm nozzle and is compatible with the Ranger 54 compressor.

- 1** Spray gunMTR3004£22.75

Underbody seal gun

This spray gun is designed specifically to make applying underbody seal a much simpler task. Supplied with an extension probe to allow spraying of rust prevention wax into body cavities and box sections. Uses standard sealant cartridges.

- 1** Underbody seal gunMTR3005£15.55
- 2** Underbody seal 1lt schutz .WO115£6.35

Air accessories kits

These accessory kits contain popular air tool accessories and offer great value.

- 1** Air accessories kit (3 piece)MTR3002£15.95
(Contains: Tyre inflator, paraffin gun & blow gun).
- 1** Air accessories kit (5 piece)MTR3003£24.50
(Contains: Tyre inflator, paraffin gun, blow gun, spray gun & recoil hose).

Air impact wrench

Remove tight nuts & bolts with this impact wrench. This 1/2" drive wrench features forward and reverse functions and 4 power settings. 1/4" BSP fittings.

- 1** Air impact wrenchMTR3008£35.95
- 1** Impact socket setMTR3010£47.95

Air ratchet

Makes easy work of undoing and doing up nuts & bolts, ideal for workshop use. Maximum speed of 160 rpm and torque of 60lb/ft.

- 1** Air ratchet 3/8" driveMTR3009£35.95
- 1** Impact socket setMTR3010£47.95

Air cut off saw

Compact design makes it ideal for use in confined areas when cutting bodywork, rusted hardware, exhausts, etc. Complete with side handle, safety guard and speed regulator.

- 1** Air cut off sawMTR3006£22.75
- 1** Replacement discs (5 pack)MTR3007£3.95

Air sabre saw

This reciprocating saw gives up to 10,000 strokes per minute and is suitable for cutting bodywork, exhausts, etc. Features a safety shut off handle and is supplied with 3 blades.

- 1** Air sabre sawMTR3011£55.94
- 1** Replacement blades (3 pack)MTR3015£4.75

POWER TOOLS

Drill press

This drill press from Clarke is a top line 'hobbyist' press ideal for the home workshop with features usually given to larger semi-pro presses. Optional drill vice allows for easy and accurate holding of work piece. Features include:
 ■ 16mm chuck ■ 12 speeds (210 to 2580 rpm) ■ 370 watt/240V motor
 ■ safety switch ■ chuck guard ■ chuck to table = 370mm ■ chuck to column = 127mm ■ 200 x 200mm rack and pinion work table.

- 1 Drill pressMTR3050£199.94
- 2 Drill press viceMTR3055£11.95

Drill bit sets

High quality Zirconium coated metric drill bit sets for improved wear resistance, up to 10 time longer than HSS.

30 piece set

- Metric sizes - 1.0mm to 13.0mm.
- Strong metal indexed storage case.

- 3 Drill bit set (30 piece)MTR221801£23.95

16 piece set

- Metric sizes - 1.5mm to 10.0mm
 (2 of 1.5, 2.0, 2.5mm. 1 of 3.0, 3.2, 3.5, 4.0, 4.5, 5, 6, 8, 10mm).
- Robust plastic storage case.

- 4 Drill bit set (16 piece)MTR221802£13.15

Angle grinder

An invaluable tool for car restoration. This compact 115mm (4.5") angle grinder is suitable for use with grinding or cutting discs & abrasive wheels and brushes. M14 spindle & 22mm disc bore adaptors, double insulated casing, spindle lock for easy disc changing, soft rubber grip, safety on/off switch, side handle.

- 1 Angle grinder 115mmMTR222101£23.95
- 2 Grinding discs - standard (10 pack)MTR3038£9.46
- 3 Cutting discs - standard (10 pack)MTR3037£7.45

Gunson

Eezibleed

Eezibleed is an automatic hydraulic brake and clutch bleeding system that uses fresh fluid under pressure to flush out old fluid from the system. Fed by air pressure from the spare tyre, into the fresh fluid container, it forces the fluid through into the master cylinder then through the hydraulic circuit. This method gives simple and easy brake and clutch bleeding for a one-man operation.

■ Eezibleed kitMRD1001£20.95

■ A simple tool to bleed brakes...

Visibleed

A simple tool for bleeding, a clear plastic hose with a one way valve allowing the fluid through but the air is prevented from returning back into the system.

■ Visibleed one-man bleed toolGAC9378X£4.40

Score 9/10

Bleeding kit

This neat bleeding kit offers easy one-man bleeding. The kit includes a plastic reservoir with a 600mm hose featuring a one-way valve.

■ Bleeding kitDMR37316£10.66

Mityvac

This hand vacuum/pressure pump comes with in-depth instructions for not only brake bleeding but also a wealth of other ideas of how the Mityvac kit can help you do a variety of jobs.

■ Mityvac vacuum bleeding kit386-215£46.96

Magnetic parts trays

These magnetic trays are great for keeping all the hardware and fasteners together during the stripping down of engines etc.

- 1 Magnetic plastic parts tray large rectangleDMR56332£12.67
- 2 Magnetic plastic parts tray small roundDMR35384£10.46

Piston ring pliers

Installs and removes piston rings from 3/64" to 1/4" without the risk of distortion. Vinyl gripped handles with spring return mechanism for easy use.

- Piston ring pliersMTR412201 .£4.94

Piston ring compressors

These spring steel clamps neatly compress piston rings to enable fitting of pistons in bores.

- Ring compressors - 45-75mm
DMR51844£14.88
- Ring compressors - 60-100mm
DMR51845£14.50

Piston ring groove cleaner

Use for fast and reliable removal of carbon and glaze deposits from piston ring grooves. Suitable for pistons from 51mm to 127mm in diameter and is supplied with three, 6-bladed cutters covering most popular piston groove sizes.

- Piston ring groove cleaner .MTR412202 .£19.96

Tappet adjuster

The easy way to set valve clearances on OHV engines. Clickadjust makes the job easy and absolutely precise. This essential clearance adjustment ensures valves open and close correctly resulting in better performance, reduced valve gear wear and noise.

- MRD1299£39.95

Cylinder head stands

A pair of support stands which locate into cylinder head via stud holes allowing clearance between the cylinder head and work bench.

- MTR411102£19.94

De-carbonising brushes

This 20 piece set of brass, steel & nylon brushes with an easy grip handle and quick-release extension bar for extended reach. Also suitable for cleaning other small parts. Brush sizes from 9-19mm diameter.

- De-carbonising brush set (20 piece)MTR411101 . . .£24.95

This 2 piece set is for use in a power drill for fast carbon removal. Other wire brushes also available on page 16.

- De-carbonising brush set (2 piece)MQC233901 . . .£1.85

Camshaft locking tool - Rover K series

Invaluable for doing cam belt changes on Rover K series 16 valve engines, not suitable for VVC. Simply locks the cams to prevent movement during cam belt changes, or cylinder head removal.

- Camshaft locking tool - Rover K series 16 valve .DMR52306£3.95

SERVICE TOOLS

Colortune

Colortune is a unique mixture setting device and a detector of other mixture related problems. It is a sparking plug, which runs the engine like any normal sparking plug, but because it has a glass insulator, it allows the colour of the combustion flame to show through. Thereby indicating the strength of the mixture or other faults.

- 1 Colortune single plug kitMRD1005£33.95
- Adaptor kit - long reach 14mmMRD10051£4.94

Timing light

A timing light is the best way to get the ignition timing correct. This timing light allows the dynamic ignition timing to be set with up to 60 degrees of advance and uses an inductive pick-up for ease of connection to the HT lead. Operates on all 12v ignition systems and the ultra bright Xenon bulb give a blue/white light that is visible in bright workshops and outdoors.

- Timing light with advance featureMRD1310£62.95

HT system tester set

4 piece set of HT lead testers. Fit them between the HT lead cap and spark plug and they show when spark energy is present.

- HT system tester set (4 piece)DMR56495£14.42

In-line HT tester

This device establishes whether there is a high tension spark potential at the spark plug. Hands free operation means no risk of electric shock to the user. Features a 55mm probe with a 100mm lead.

- HT ignition tester in-lineDMR38898£9.31

Gas tester

Gas tester is used for the testing and setting of all petrol carburettor and injection systems on any vehicle. It provides a simple and inexpensive method of showing the correct air-fuel ratio. The procedure ensures settings are within the vehicle manufacturer's tolerance limits for C.O. content in exhaust gas. Calibrates in air, no moving parts to wear out, and no filters to change and is accurate to 0.5% C.O. measurement.

- Gas tester digitalMRD1207£126.95

Lo-gauge vacuum tester

This vacuum gauge is a useful item for any car enthusiast. Easy to use and connect to the inlet manifold of most cars using the adaptors provided in the kit. The gauge ranges from full vacuum to 10psi and is calibrated in ins/hg of vacuum. The scales also detail useful diagnostic information to help keep your car in a good state of tune.

- Lo-gauge vacuum testerMRD1308£18.95

Hi-gauge compression tester

Measuring the compression (pressure) in the engine's combustion chamber is the best way to diagnose the condition of the engine. Low combustion chamber pressure can indicate poor sealing of valves, compression rings or gaskets. If used during a regular service it can give advanced warning of potential problems so action can be taken before component failure.

- 1 Hi-gauge compression testerMRD1307£30.95
- 2 Professional compression tester kitMTR4101£40.30

Carburettor balancers

Getting the airflow through the carburettors right is one of the key factors to a well running engine. These carburettor balancers allow the setting up of twin carburettor systems with ease.

- 1 Carburettor balancer flat typeMM386-200£29.95
- 2 Carburettor balancer cone type375-324£44.95

Spark plug wrenches

Chrome vanadium steel with soft grip. Available for 14mm and 10mm plugs.

Spark plug brush

Brass and nylon bristle brush for cleaning spark plugs prior to regapping.

- 1 MTR1009£2.60

Lucas points tool

Handy for adjusting points gap, features a screwdriver tip and feeler gauge.

- 1 500905£5.95

Remote starter switch

This handy push-button operation switch can be connected in the starter motor circuit to allow remote cranking of the engine without having to return to the ignition switch. Ideal for carrying out compression tests and other diagnostic tasks. Features 1.5 metre cable, insulated crocodile clips and a connectivity warning LED.

- 1 Remote starter switchMTR421901£43.96

Desiccant plug set

Rust in the cylinders, caused by moisture, is one of your engine's greatest enemies. Whether storing an engine long term, or just for the winter, you need to install a set of desiccant plugs. The aircraft industry has used these for years. Remove your spark plugs, screw in a set of our special automotive desiccant plugs, and your cylinders are protected. The desiccant changes colour when exposed to moisture, giving a visual indication they are working. Plugs come ready to use, in a dry sealed container.

- 1 Desiccant plug set 14mm 4 pieceMTR421903£42.95
- 2 Desiccant plug set 14mm 6 pieceMTR421904£61.96

Oil can

This useful little pressure feed oil can has a capacity of 0.2lt and a flexible spout.

ADVERTORIAL

moss-europe.co.uk

Millers Oils have designed a range of high performance fuel treatments designed for the classic car enthusiast.

The removal of lead from fuels and addition of ethanol to fuel can cause problems for classic vehicles ranging from valve seat recession to fuel tank/system corrosion. Ethanol also attacks rubber hoses and seals in fuel systems and metallic parts such as brass and zinc. It also attracts water which can cause corrosion and poor starting. *See page 5.*

London 020 8867 2020 Bradford 01274 539 999 Bristol 0117 923 2523
Manchester 0161 480 6402 Paris 01 30 80 20 30

Millers VSPe Power Plus (Endorsed by FBHVC)

Lead replacement and octane booster with added benefit of ethanol protection. Adds up to 2 octane numbers (20 points) to pump fuel, it prevents valve seat recession and combats the adverse effects of ethanol in fuel. Also contains additives to prevent fuel system corrosion and anti-oxidants to improve fuel life. Recommended for all classic engines previously requiring leaded fuel, now running on unleaded fuel.

VSPe (Endorsed by FBHVC)

Lead replacement with ethanol protection. Prevents valve seat recession and combats the adverse effects of ethanol in fuel. Also contains additives to prevent fuel system corrosion and anti-oxidants to improve fuel life. Recommended for all classic engines previously requiring leaded fuel, now running on unleaded fuel, where an octane improver is not required.

EPS (Endorsed by FBHVC)

Ethanol protection only. Combats the adverse effects of ethanol in fuel, also contains additives to prevent fuel system corrosion. Recommended for classic engines that have been rebuilt (or fitted with a cylinder head that has been rebuilt) using hardened valve seats, previously requiring leaded fuel, now running on unleaded fuel where lead replacement and an octane improver are not required.

CVL - Competition Valve Lubricant

Complies with FIA fuel regulations for historic racing and enables older race engines to run safely on unleaded fuel. Adds 3 octane to base fuel.

CVL Turbo

An out and out octane booster, adding 4 octane to base fuel, ideal for track days and wherever the maximum octane is required. Will give 103 octane when added to Shell V Power.
